

THE NEWS-BULLETIN

Vol. 1, No. 22

MOKENA, WILL COUNTY, ILL., FRIDAY, JAN. 9, 1920.

\$2.00 Per Year.

OLD AGE AND YOUTH PASS AWAY AT TINLEY PARK; BOTH BELOVED

Tinley Park, Jan. 9.—Henry Kammert, well-known Tinley Park resident, who was stricken with a stroke of paralysis last Monday, died Friday morning at six o'clock. Mr. Kammert was a resident of Tinley Park for a great many years and for many years conducted a meat market here.

Funeral services were held Monday morning at the late home, concluding at the German Methodist church, Rev. A. Ludwig officiating. The deceased is survived by his widow and other relatives.

MISS MARTHA MEYERS DIES.

Miss Martha Meyers, fourteen-year-old daughter of Mr. and Mrs. Fred Meyers, died Friday morning following a siege of illness. She had been in poor health all summer, but of late had improved somewhat. She was a member of the 1920 confirmation class of the Zion Lutheran church.

Funeral services were held Monday afternoon at 1:30 o'clock from the late home, concluding at the Zion Lutheran church, Rev. A. Buddenhagen officiating. The deceased is survived by her parents, one sister, Hilda, and an infant brother, Fred, and grandmother, Mrs. Edward Vigt.

HOLD NEW YEAR PARTY.

Mr. and Mrs. Ben Rick entertained a company of friends at a New Year's party in honor of Mr. and Mrs. George Roden of Chicago, who were just recently married. The young couple are quite well known to the Tinley Park folk.

George Lorenz has an attraction at his saloon by way of a real, live possum, which his brother will brought from Mokena. The possum was caught in the woods near Moline, showing that there are still some wild animals roaming at large near that burg.

FORMER PASTOR GOES TO CHICAGO

Rev. Ernest Lehman of Joliet, former pastor of the Zion Lutheran church of Tinley Park, has accepted a call from the Trinity Lutheran church at Chicago. Rev. Mr. Buddenhagen had also received a call from this same church last fall, but turned down the call. Rev. Mr. Lehman leaves for his new charge soon. Mr. Buddenhagen was called on to fill the pulpit of the Joliet pastor's church on New Year night.

RETURNS TO STUDIES.

Arnold Hoeferer, who has been spending the holidays with his uncle, Rev. A. Buddenhagen and family, returned Monday to the Lutheran Theological seminary at Dubuque, Ia.

TEACHER ILL—NO SCHOOL.

Miss Jerguson, teacher of the primary department of the Tinley Park public school, is on the sick list. The pupils of this room are having a vacation for the week as a result.

TO HOLD ANNUAL MEETING.

The annual congregational meeting of the Zion Lutheran church will be held Sunday afternoon at two o'clock at the church. All the members are invited to be present as important business is to be discussed and transacted.

GET COAL SUPPLY.

Tinley Park has a good supply of coal on hand, a carload of soft coal being received by the Beatty Lumber company Monday morning. Many of the local residents had empty coal bins.

The Tinley Park M. W. A. will direct a masquerade ball at the Sanger hall, and everyone is invited. The business men of the village have donated many valuable and useful articles for prizes.

Several cases of scarlet fever and chicken pox have been reported in the surrounding country. No serious cases, however, are reported.

Mr. and Mrs. George Lorenz visited with relatives in Chicago over Sunday.

The Ladies' Aid society of the Zion Lutheran church met Wednesday at the German school house.

Mr. Bauer, well-known old settler and resident of Tinley Park, is quite ill and confined to bed.

RING IN NEW YEAR.

The New Year was ushered in at Mokena by the ringing of the church bells at the midnight hour. A watch-night party was held at the home of Miss Alma Bachstain, a company of young folks being entertained.

New Lenox Fire Insurance Company Meets.

New Lenox, Jan. 9. (Special to the News-Bulletin) The New Lenox County Mutual Fire Insurance Co. held its annual stockholders meeting Tuesday morning at the Grange Hall. The stockholders were not quite as largely represented as usual on account of a sale nearby. The following directors were elected: James McGraw of Manhattan, Louis Eberhardt and Ernest Oram of New Lenox.

The Board of Directors will hold another meeting within the next few days to elect a president, secretary and treasurer.

The valuation on stock was raised to \$75 which is the maximum for insurance on cattle.

New Lenox, Jan. 9 (Special to News-Bulletin) — Mrs. George Hanson has received news that triplet boys were born to her niece, Mrs. Rose Myers of Toledo, O., on New Year's eve. The infants weighed four pounds each. All are well. Mrs. Myers is quite well known in this section and especially in and around Joliet.

SPARK CAUSES BLAZE.

The summer kitchen adjoining the home of Henry Craven, Rock Island section foreman, caught fire last Wednesday, supposedly from a spark from a passing train, as the blaze was discovered on the roof shortly after a train had passed. It was with hard work that the home was saved. A bucket brigade was organized and practically the whole village turned out to fight the fire. Snow was thrown on the roof and the burning building was pushed to one side. All the contents of the kitchen, including a new electric washing machine, oil stove, etc., burned. The loss is estimated at about \$500.

ON INSTITUTE PROGRAM.

Rev. Mr. Paustain, pastor of the Lincoln Highway Methodist church, has been placed on the annual Will County Farmers' institute program for the thirty-eighth annual session to be held in Joliet the fore part of February.

GO IN COAL BUSINESS.

New Lenox is at last supplied again with a coal yard. Edward Francis and Bert Brown have entered the business and received a good supply of coal the past week, thus insuring the residents a chance to replenish their fast diminishing bins.

No Sunday Service Held Afternoon.

The regular afternoon service at the Mokena M. E. church had to be dispensed with Sunday. Rev. Mr. Herrick of Joliet, who has charge of this pastorate, telephoned that he had encountered trouble with his Ford near New Lenox, and was not able to get any train on the Rock Island that would bring him out here in time for the services.

MANY ATTEND DANCE.

A large number of Mokena young folks attended the dance held at the Grange hall, New Lenox, Thursday evening.

Hold Successful Dance.

New Lenox, Jan. 9.—The New Lenox Dance club had a wonderful success with the first dance they directed at the Orange hall New Year's night. The hall was literally jammed and there was hardly standing room. A large company of young folks came from Joliet, Frankfort and Mokena. The boys have been so much encouraged by the liberal support which they have received that they have decided to hold dances every Saturday night. The Sweet orchestra of Joliet has been engaged to furnish the music for the whole season. The New Lenox Royal Neighbors have taken charge of the refreshment end and are doing well. They will serve lunches at every dance. The next dance will be Saturday night of this week. The new floor has made quite a hit with the dancers, all of whom expressed themselves as well pleased the other night.

MOKENA DADS DEAD BROKE, NO COIN TO MAKE THE MULE TRAVEL

As the result of having no revenue income, and expenses increasing, making it a case of everything going out and nothing coming in, the village finds itself "broke." At the session last Wednesday night claims amounting to over \$350 were presented and the treasurer only had \$9 in the treasury. The cause for this condition is the saloons going out of business. The only income the village has is some water revenue which does not begin to pay for the upkeep of the village water system. The small amount derived from special taxes is so small that it does not cut any figure in the revenue income. The money derived from taxation is not adequate to pay off the bonded indebtedness and the other expenses. From present indications it appears that the village will remain practically in debt unless other

means can be found for increasing the revenue. The saloon license revenue came to \$1,500 per year, and since this has been cut off a big deficit exists.

In addition to all the running expenses of the village the problem of a new well stares the villagers in the face. The large volume of water consumed is taxing the present well beyond capacity. The breakdowns, loss due to motors burning out, etc., has made an additional expense of \$1,000 the past year.

In order to have an adequate water supply for local needs and for fire protection the village must have a deeper well and better pumping equipment. It is estimated that a new well and pumping outfit would cost \$2,000 or better. In order to carry out this work the village would have to be bonded. It is probable that the matter may be brought to the attention of the voters at the spring election.

FRANKFORT PASTOR GETS LIFT IN SALARY TO BEAT H. C. L.

Frankfort Boy Returns; Been Much in Mexico.

Frankfort, Jan. 9.—Clem Geuther, son of Mr. and Mrs. Fred Geuther, who has been in Mexico with the American army the past seven years, arrived home the latter part of the week.

Mr. Geuther has seen a great deal of Mexico and the Mexicans. He has seen Villa twice. He states that Villa is quite well educated, and that he once belonged to the American army, but deserted and went to Mexico, where he headed a band of bandits, who have been raiding along the Mexican border and who have raised rough house generally. Villa is a half-breed. Mr. Geuther has seen him ride up and down the border line talking to the colored troops of the American army saying "Come over and join my army and I will make you a captain or a lieutenant."

Mexico is no country for a white man. The Mexicans are very treacherous and would just as soon kill a white man as look at him. By bringing in the right kind of civilization the country can be made worth something.

Mr. Geuther was with the expeditionary force that went into Mexico to catch Villa. The Americans camped at a spot at noon where Villa had had his breakfast the same morning.

Mr. Geuther expects to stay here for two months, following which he intends to go to Texas.

FRANKFORT HAS A NEW DENTIST.

Frankfort has a new dentist, Dr. Clarence L. Oesterle of Joliet has opened an office in the Folkers building, succeeding Doctor Spires, who returned to Joliet last fall. The new dentist comes well recommended and no doubt will find this a good field. He will be in Frankfort each week. Frankfort has been in need of a good dentist and should give him a liberal support.

MAY TRY THE CASE OVER AGAIN.

The lawsuit case of Voss & Kunkler against the town of Frankfort has raised much comment and interest. It is understood that through the jury making an error in returning their verdict the verdict is not legal, and it is probable that the case will have to be tried over again. The town officials consider the verdict as it now stands a victory for the town.

LOSES EYE.

Oran Daist, five-year-old son of Mr. and Mrs. Emil Daist, had his left eye removed the past week as the result of falling on the point of a lightning rod last summer. Dr. W. V. Hedges had charge of the case.

BROTHERHOOD MAKES GIFT.

The Brotherhood of St. Peter's Evangelical church made a cash present of \$25 to Rev. G. Lambrecht for a Christmas gift.

M. W. A. INSTALL OFFICERS.

The Frankfort camp of the M. W. A. installed their newly elected officers at the Frankfort hall Tuesday night.

Miss Ruby Collier, who has been suffering with a severe attack of blood poisoning, is improving nicely. Mrs. Thomas Collier, who has been quite ill for several weeks, is also gaining.

William Peters, who has been quite ill, is able to be out again.

The Frankfort public school reopened Monday following a week's vacation during the holiday season.

Mrs. Harry Berst of Moline is visiting with her parents, Rev. and Mrs. G. Lambrecht.

Born on December 28 to Mr. and Mrs. William Rahm, a nine-pound daughter.

Born on December 29 to Mr. and Mrs. Arthur Nieland an eight-pound boy.

Mokena Pumping Station Goes Wrong Again.

The local village pumping station was in trouble again the past week when the pumping apparatus went wrong allowing the cylinder to fall to the bottom of the well. John Mathews of Joliet, a well driller, was called, but did not succeed in raising the cylinder. As a result a new cylinder had to be purchased. After much hard work the pumping apparatus was put together again and placed in operation.

The annual congregational meeting of the St. Peter's German Evangelical church was held at the church Friday morning. Many and interesting reports were read showing the activity of the church during the past year. One big feature was the report that the Ladies' Aid society has paid off \$1,125 of the church indebtedness. The total remaining indebtedness is about \$2,300, which the congregation hopes to be able to pay off soon.

The salary of Rev. G. Lambrecht was raised \$200 per year, giving him an income of \$1,200 per year. This amount does not include Green Garden, however, which is a separate charge.

Seven new members were received into full church membership. The total membership of the church is now about 160 families.

The following church trustees were elected for the ensuing year: Christ Hohenstein, Fred Klepper and H. Engleman.

BIG DEMAND FOR TRACTORS.

The Hart-Parr tractors have been selling well in this section. Fred Warning & Son have listed the following Hart-Parr buyers in this and surrounding territory: Albert Steinberg, Arthur Bechstein, Harry Daul, Clifford Baker, William Schellbase, John Waldvogel, John Gates, Henry Yunker, Frank Marti, Nick Yunker, Ervin Miller and Ray Golst.

CENSUS TAKER EXPECTED.

Frankfort is ready to receive the census taker. J. J. Grogan of Moline is the census enumerator for Frankfort township. He has just started on his work and will soon make his calls here.

TO HOLD SALE.

R. Balchowsky & Sons will hold their twelfth annual sale beginning next Saturday and continuing for 12 days.

The dance held by the Frankfort Hall company New Year's eve was very largely attended and all enjoyed a good time. A big masquerade dance is being planned for next, the date to be announced later.

Charles Fyle is ill at the Silver Cross hospital, Joliet. He is somewhat improved.

Louis Sehnagen, who underwent an operation at the Silver Cross hospital, Joliet, for appendicitis the past week is improving so nicely that he is expected home again this week. Dr. W. V. Hedges performed the operation.

Mokena Asks For Open Crossing.

Rock Island officials called on the village officials recently in connection with the crossing west of the depot. This crossing had been used for a great many years by the public, but this fall it was condemned by the railroads as being dangerous. The planks were removed and the crossing closed. This crossing was used as a handy short cut by those driving to the south part of the village. As it is now teams must use the Bowman crossing or the Mokena street crossing next to the depot. The railroad officials promised to investigate the matter, but nothing has been promised as to whether or not the crossing in question will be opened again.

UNDERGOES OPERATION.

M. P. Knapp went to Milwaukee the first of the week to undergo an operation for eye trouble. Doctor Snider, a country-wide, renowned eye specialist, will perform the operation.

Mrs. Hugo Stammer, sister of Mrs. E. P. Knapp, who recently underwent a serious operation at a Chicago hospital, is improving nicely.

Hal Hal The Glancys.

With the contest even the News-Bulletin is going to put on some features that will, surely, please. This week we expect to begin running a comic strip, "The Glancy Kids," which will be a regular feature of this paper for every week. These kids will surely make you laugh and will be great factors in dispelling the "blues." In addition to this feature we will start the New Year with a serial story which will also be a regular feature of this paper. In addition we are planning to give a resume of the county house news each week. As we go along we hope to add other interesting and noteworthy features.

We are going to give you the best paper in this section and will make it so interesting that you will not get along without it.

Though
Logical
Story

A genius for odd, unusual, deeply absorbing plots, Holworthy Hall has here given his best talent. Not a war, but an after the war story. True, the war furnished the first incident and it also furnished the hero with the strangest opportunity, the most complex problem and involved code of ethics a man ever had.

Did Woman Ever Have Experience More Amazing Than That of Being Wooed Twice by the Same Man Under Different Characters?

It is but one of the many astounding elements of this tale, which starts off with a punch and holds the undivided interest of the reader until the end. Do not miss it! It is

OUR NEW SERIAL

EUROPEAN BORER IS DESTRUCTIVE

Estimated Loss of Million Dollars Daily if Insect Once Gets Established.

FOUND IN EASTERN STATES

Larva Is Dirty White Caterpillar, About One Inch Long, With Brown Head—Ears of Corn Are Bored Through.

A million dollars' worth of damage a day is conservatively estimated as the effect of the European corn borer if it once gets established in the corn belt of the United States. This is the statement of George A. Dean, head of the entomology department in the Kansas State Agricultural college.

The insect, which has done tremendous damage in Europe and Asia, has been introduced into New York and Massachusetts and is looked for in other regions.

Larva Is White Caterpillar.
The larva of the European corn borer is a dirty white caterpillar, about an inch long, with a brown head. It passes the winter in a nearly full-grown condition within its food plants. In the spring its growth is completed and it then bores its way to the surface of the food plant, where it makes a slight hole to serve as an exit for the resulting moth.

The larva now forms a cocoon in the burrow, passes into the pupal stage, and in about two weeks the adult moth emerges. The moth, which lives about two weeks, deposits 300 to 500 eggs on the food plant. In about five days the eggs hatch, and the young larvae at first feed on the tender shoots of the plants, but finally bore their way into the main stem of the plant. In about six weeks, after burrowing through all parts of the plant, the larvae pupate as before and emerge as moths about the middle of summer.

The female moths of the second brood do the greatest damage to corn, since they attack not only the stalk, but also the tassel and the ear, and continue feeding until cold weather.

Destroy Ears Completely.
The ears of corn are bored through from bottom to top and from side to side, the borers feeding on the kernels while they are soft. Complete de-

GRASSHOPPERS MAKE FINE POULTRY FEED

Especially Relished by Turkeys and Guinea Fowls.

Fowls Consume Millions of Destructive Insects During Course of Year With Minimum Amount of Trouble to Farmers.

Grasshoppers are beginning to pay big cash dividends in North Dakota through the medium of poultry, especially in turkeys and guinea fowls. The experiment has been successfully tried at the state agricultural college and numerous farmers have taken the cue.

Fattened Turkeys Being Driven to Market.

Wherever there are green fields, there are grasshoppers and other insects. G. R. Greaves of the agricultural college, who has conducted the experiments, says:

"It seems the inexorable law of nature that wherever there is something good to eat there is something to eat it, and man's existence is a continual struggle for supremacy over the creatures that are determined to consume the food he requires."

During past years in North Dakota, prairie chickens, sage hens and grouse held the grasshoppers in check, and their plumpness and the delicious quality of their meat attested to the superiority of their food.

Now the prairie chickens especially are going the way of the buffalo, and Mr. Greaves was assigned to find a substitute that would keep down the insect pests with a minimum of trouble and expense to the farmer. The answer is turkeys and guineas.

Mr. Greaves declares that flocks of turkeys and guineas consume millions of grasshoppers and other insect pests,

and naturally do their own foraging. Early in the season the experimental flocks at the agricultural college have grown fat and strong on the young insects.

Later in the season they have received the abundant exercise necessary for their proper market conditioning by chasing the elusive hoppers, have saved the field crops and provided a new, big source of income.

"Three old turkeys kept through one winter," said Mr. Greaves, "produced a flock of young turkeys the following season which kept the fields near their house clear of grasshoppers, and fulfilled their destiny by gracing Thanksgiving tables."

BEST PRACTICE IN PLOWING

According to Minnesota Expert It Is Best to Deepen Furrows Gradually Each Year.

The nature of the soil and the crop to be grown should determine the question of whether to plow deeply or more shallow. As with most other farm problems, the farm operator's judgment and experience must be called into play in determining which practice is best on any farm.

Andrew Boss, vice director of the Minnesota experiment station, believes that deep furrows turned on edge, or "three-quarters over," furnish the best conditions for pulverizing and sweetening the soil. "It is not good practice," he says, "to deepen the plowing greatly in any one year. It is better to deepen it by one-half inch or an inch each year until a sufficient depth has been reached. Rarely is it necessary to plow deeper than seven or eight inches, except for certain deep-rooted crops like sugar beets, carrots, potatoes and like crops.

"Where it is desirable to incorporate in the soil water-holding material, such as a green manure crop or a dressing of coarse barnyard manure, deep plowing is wise. Either a very sandy or a very heavy dense clay would be benefited by such treatment periodically."

FALLACIOUS IDEA OF SHEEP

Animals Will Consume More Weeds and Shrubs Than Other Animals, but Need Some Feed.

Many farmers who have failed with sheep have gone into the business with the fallacious idea that sheep will eat anything, simply because some misinformed person started the tale. Sheep will consume more weeds and shrubs than any other class of animals, but to turn them into the woodlot and expect them to thrive on sprouts and dry leaves is asking too much of their digestive systems. However, there is usually waste land on most farms on which the sheep may be kept at certain periods of the year very profitably.

AUTOMOBILE-THIEF ALARM IS EFFICIENT AND IS NOT DIFFICULT OF INSTALLATION

As the Thief Takes His Seat at the Steering Wheel, He Sets Going an Invisible Alarm Bell, Which Continues to Ring Until Switched Off by a Concealed Switch in Another Part of the Car.

Many good and efficient automobile locks have been called into existence by the epidemic of automobile thefts, and there is now no excuse for leaving a car unprotected. The locks in general use are of several classes, each presenting its own advantages and open to its own objections. Electrical locks for merely breaking the ignition circuit were the first on the scene, and are still used to some extent, although no expert automobile thief would be delayed by them for more than a few seconds, as he would simply connect around the "lock" with a wire leading directly from the battery to the igniter.

Complicated Locks.
Gasoline-line locks are useful, but somewhat complicated in their installation, and introduce the questionable element of additional opportunity for gasoline leakage. Probably the favorite method is a purely mechanical lock, on the steering gear, the starting crank, or some other essential part of the mechanism.

While all of these locks may be relied upon to prevent or at least delay considerably the work of the thief,

Various Parts of Circuit.

few, if any, of them are of any assistance to the police in capturing the would-be thief. The device here described is intended to accomplish this purpose, and at the same time furnish a protective device with all the convenience of the ignition lock.

The effect of the contrivance is that, when a thief enters the car and takes his place in the driver's seat, an invisible alarm bell under the car starts

ringing, and continues to ring even after the thief leaves his seat and seeks safety from the police or citizens who are sure to be attracted by the noise of the bell. The bell will continue to ring until the owner returns to the car, or until somebody finds the hidden control switch and turns it off. Of course, if the thief is ingenious enough to find this switch at once, he can turn off the alarm himself, but there is small chance of a thief working very long around a car to the accompaniment of a loudly clanging bell.

Diagram Explains.
The various parts of the circuit and their connection are shown in the diagram. The materials needed are: One or more small switches to be concealed as well as possible within reach of the driver; a good, loud electric bell; a relay, or circuit breaker, such as is used on nearly all modern automobiles to connect the generator to the battery when the proper speed is reached; some resistance wire, large enough to carry several amperes of current and some pieces of wood and spring brass to make the seat switch. As will be noted in the circuit diagram when the concealed switch is closed and the seat switch is closed, the circuit through the bell is established, and, at the same time, the circuit through the circuit-breaker switch, so that, even though the latter is open, the bell continues to ring. The resistance coil would not be necessary if the circuit through the bell was continuous. Since, however, it is interrupted at each part of the bell, the coil is necessary in order to maintain a sufficient current through the circuit breaker to keep it from permitting the shunt circuit across the seat switch to open, thus stopping the alarm. The only way the alarm can be stopped is by breaking the main circuit, either at the concealed switch or at some other point. If properly wired this cannot be done by a stranger without a spending considerable time, which, under the circumstances, is out of the question for a thief, at least in a city or town.—Popular Mechanics Magazine.

CASUALTIES DUE TO RANK CARELESSNESS

Drivers Fail to Comply With Few Simple Rules.

Don't Rely Wholly on Other Fellow Doing Right Thing—Look Carefully Both Ways in Crossing Streets and Go Slow.

"Most automobile accidents are due to lack of a little common sense and carelessness in complying with a few simple driving rules. It isn't always the first-time owner who gets his name in the accident columns," says George Stowe, president of a motor-car company.

First assume that you must look out for yourself and the other fellow, too. Don't rely wholly on the other fellow doing the right thing and you'll be on your guard if he does the wrong thing.

Never back or swing from the curb into the street without looking back to see if the way is clear.

Glance both ways on each cross street, and if you're not on the main thoroughfare slow down before you cross. It's safest to drive slowly enough to have the car well under control where buildings hide intersecting streets.

Do not cut corners in turning, but keep to your side of the street and look both ways before you make a turn.

Put out a hand as a guide to the car following or approaching.

If passing a slower vehicle pass on your left, but in passing a street car always keep to the right.

Do not follow another vehicle too closely. It might stop suddenly.

Stop when the street car ahead of you stops and stand still till all passengers getting off are out of the street.

GRABBING CLUTCH HARMFUL

Mechanism That Transmits Power From Engine to Wheels Is Receiving Destructive Strain.

The car owner should remember that when the clutch takes a fierce hold and does not have a slight slip, the mechanism that transmits the power from the engine to the drive wheels, particularly as regards pinions, universal joints and gear teeth, receives destructive strains.

MOUNT STRAIGHT-SIDE TIRES

Best Method Is First to Lay Rim on Floor and Insert Valve Stem in Proper Place.

The best method of mounting straight-side tires is first to lay the rim on the floor and insert the valve stem of the tire in the proper place. About ten inches of the bead on both sides of the valve should then be forced into place. After thus starting the tire it should be further forced into place by stamping on it, first on one side and then on the other, which as a rule is all that is necessary to seat the tire properly, though sometimes it may be necessary to resort to the aid of a tire tool. The ends of the rim may be brought into place with the use of a screw-driver, due care being taken not to get the wrong end of the rim on top.

AUTOMOBILE NEWS

The brake mechanism seldom gets the lubrication it deserves.

Motorists should prevent all possible corrosion of battery terminals.

The body of the car should be cleaned with castile soap and water.

Few owners pay the attention to the ball bearings that these latter deserve.

Undoubtedly, the jack is one of the most difficult tools to carry in the car's equipment.

In the absence of fuller's earth ordinary talcum powder may be used to stop cone clutch slippage.

The best utensil for removing dust from the engine is a thick soft brush of the sort that painters use.

A charge is the quantity of mixture, gas and air, taken into the gas engine cylinder on the suction stroke.

A mixture of flake graphite and grease applied to the screw threads is excellent in preventing the formation of rust.

To prevent children from playing with the horn and thus exhausting the battery, a switch may be placed in series with the horn circuit and the current turned off when the car is stopped.

MORE THAN GREAT PAINTER

Gustave Dore Is Declared to Have Been an Accomplished Player on the Violin.

Gustave Dore (the painter) was said to be famous on the violin, and his claims to consideration were far from inconsiderable. He had acquired a valuable instrument, on which he used to play Berlioz's concertos with a really extraordinary facility and spirit. These superficial works were enough for his musical powers. The surprising thing about his execution was that he never worked at it. If he could not get a thing at once, he gave it up for good and all.

We lived in the same quarter and visited each other frequently. As we almost never were of the same opinion about anything, we had interminable arguments, entirely free from rancor, which we thoroughly enjoyed. I have seen him painting away on thirty canvases at the same time in his immense studio. Three seriously studied pictures would have been worth more.

At heart this great, overgrown, jovial boy was melancholy and sensitive. He died young of heart disease, aggravated by grief over the death of his mother, from whom he had never been separated. I dedicated a slight piece written for the violin to Dore. It would be entirely unknown had not Johannes Wolf, the violinist of queens and empresses, done me the favor of placing it in his repertory and bringing his fine talent to its aid.—"Anecdotes," by Saint-Saens.

WHERE PEDDLER IS SUPREME

In Lithuania People Almost Everywhere Are Dependent on the Traveling "Merchant."

The peddler, who has almost disappeared entirely in American farming communities, is still a very important institution in Lithuania. His outfit there is a veritable department store. His customers are dependent upon him for nearly everything they do not raise or make upon their own farms. There are not even any mail-order houses to encroach upon his wide domain.

Everything the peasant home in Lithuania is not able to produce must be brought many miles. Railroads are few. And so, through the peddlers, with their surprisingly varied stock in trade, Lithuanian mothers do their own shopping at their own doorstep. These peddlers come to the peasant's cottage with linen goods, fancy cloth for dresses, handkerchiefs, aprons, combs and brushes, stationery, trinkets, hardware, household utensils, sugar, salt, soap and even shoe blacking.

If cash is to be had, the peddlers accept it readily, but they are just as ready to barter soap for some household article, or sugar for native needlework.

Grand Pre.

The Evangeline district of Nova Scotia is best seen by driving out from the town of Wolfville, which stands on the southern shores of Minas Basin. A drive of from ten to twelve miles will give the visitor a fair idea of the whole countryside. Passing over a ridge near the town, the visitor comes to the Gaspereau valley and the lake that gives the valley its name. Gaspereau is the French name of alewives, a kind of herring which abound in these waters. On all sides are orchards and off to the left at the foot of a small ridge is the hamlet of Grand Pre. The site of the old French village, close to the railway station, is marked by a clump of willows, an old well, and the cellars of a few cottages. From this point the visitor may drive to the north, across the expanse of fertile dyked meadow that gave name to the village.

Famous Woman Orator.

Mary A. Livermore was born in Boston, Mass., Dec. 13, 1821. She was not more than 11 or 12 years old when she conceived the idea of helping her parents by some definite occupation. She learned to sew, and made flannel shirts at 6 1/4 cents apiece. Regarded by the pastor of her church as a prodigy, at the age of 14 she was sent by him to the Charlestown Female seminary, where she soon ranked with the best scholars the institution ever had. At the age of 20 she was placed in charge of the Duxbury high school, Mass., a position of unusual rank for a woman at that time. With the outbreak of the Civil war in 1861 she became an organizer in woman's war work. In 1863 she made her first public address at Dubuque, Iowa. Her wonderful talents as an orator were immediately recognized, and her fame as a speaker soon became nationwide.

Pupil Used His Head.

The sergeant instructor was suspicious and angry. "Why aren't you working out the sum—you've got a pen and paper, haven't you?" he demanded.

The pupil replied that he supposed the only thing required was the answer, and he had furnished it, and so saved paper.

"Yes, but where did you get the answer from—who told you?" he was asked by the puzzled instructor. "I did it in my head," he was assured.

"Oh, that's simply swank!" retorted his master. But in course of time he found that his "pupil" did know something of the matter in hand—and promoted him. "You shall read out the sum to the rest," he said.—London Chronicle.

ARMISTICE!

Constipation, Headache, Colds, Biliousness, Suffer to "Cascarets"

Bring back peace! Enjoy life! Your system is filled with liver and bowel poison which keeps your skin sallow, your stomach upset, your head dull and aching. Your meals are turning into poison gases and acids. You can not feel right. Don't stay bilious or constipated. Feel splendid always by taking Cascarets occasionally. They act without griping or inconvenience. They never sicken you like Calomel, Salts, Oil or nasty, harsh Pills. They cost so little too—Cascarets work while you sleep.—Adv.

Don't wait until it begins to sprinkle before starting to lay in something for a rainy day.

GREEN'S AUGUST FLOWER.

Constipation invites other troubles which come speedily unless quickly checked and overcome by Green's August Flower which is a gentle laxative, regulates digestion both in stomach and intestines, cleans and sweetens the stomach and alimentary canal, stimulates the liver to secrete the bile and impurities from the blood. It is a sovereign remedy used in many thousands of households all over the civilized world for more than half a century by those who have suffered with indigestion, nervous dyspepsia, sluggish liver, coming up of food, palpitation, constipation and other intestinal troubles. Sold by druggists and dealers everywhere. Try a bottle, take no substitute.—Adv.

Two can starve more quickly than one.

Thousands Have Kidney Trouble and Never Suspect It

Applicants for Insurance Often Rejected.

Judging from reports from druggists who are constantly in direct touch with the public, there is one preparation that has been very successful in overcoming these conditions. The mild and healing influence of Dr. Kilmer's Swamp-Root is soon realized. It stands the highest for its remarkable record of success.

An examining physician for one of the prominent Life Insurance Companies, in an interview on the subject, made the astonishing statement that one reason why so many applicants for insurance are rejected is because kidney trouble is so common to the American people, and the large majority of those whose applications are declined do not even suspect that they have the disease. It is on sale at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

It is easy to be content with what we have; it's what we haven't that worries us.

Garfield Tea, by purifying the blood, eradicates rheumatism, dyspepsia and many chronic ailments.—Adv.

The dread of censure is the death blow of genius.

"Cold in the Head"

Is an acute attack of Nasal Catarrh. Persons who are subject to frequent "colds in the head" will find that the use of HALL'S CATARRH MEDICINE will build up the system, cleanse the blood and render them less liable to colds. Repeated attacks of Acute Catarrh may lead to Chronic Catarrh.

HALL'S CATARRH MEDICINE is taken internally and acts through the Blood on the Mucous Surfaces of the System. All Druggists 75c. Testimonials free. \$10.00 for any case of catarrh that HALL'S CATARRH MEDICINE will not cure. F. J. Cheney & Co., Toledo, Ohio.

The greater the extravagance the sooner the crash.

ASPIRIN FOR HEADACHE

Name "Bayer" is on Genuine Aspirin—say Bayer

Insist on "Bayer Tablets of Aspirin" in a "Bayer package," containing proper directions for Headache, Colds, Pain, Neuralgia, Lumbago, and Rheumatism. Name "Bayer" means genuine Aspirin prescribed by physicians for nineteen years. Handy tin boxes of 12 tablets cost few cents. Aspirin is trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid.—Adv.

Smother your "grouch" with a whistle.

Use **MURINE** Night and Morning. Keep Your Eyes Clean, Clear and Healthy. Write for Free Eye Care Book Murine Co., Chicago, U.S.A.

WHAT DOCTOR PIERCE HAS DONE FOR HUMANITY!

BY DOCTOR CRIPPS

It has always seemed to me that Dr. Pierce of Buffalo, N. Y., should be placed near the top when a list of America's great benefactors is written. He studied and conquered human diseases to a degree that few realize. Whenever he found a remedy that overcame disease, he at once announced it in the newspapers and told where it could be bought at a small price. He did not follow the usual custom of keeping the ingredients secret, so that the rich only could afford to buy.

Savanna, Ill.—"I found the greatest satisfaction in taking Dr. Pierce's Favorite Prescription. It is an excellent medicine to give to a woman. I have taken the 'Prescription' during pregnancy and afterwards when I was run-down and weak, and in both cases it proved very beneficial. I was stronger and healthier after taking this medicine, and I take pleasure in recommending it."

—Mrs. Charles E. Mullin, 1024 N. Main street.

Rockford, Ill.—"Last winter I had a severe bronchial cough, which Dr. Pierce's Golden Medical Discovery cured. The relief was so prompt and permanent that I am very enthusiastic in praise of the 'Golden Medical Discovery.' I also had occasion to use Dr. Pierce's Extract of Smart-Weed recently. It was recommended to me very highly to break up a cold when my friends thought I was coming down with the influenza, and it certainly did break up my cold, so that I feel sure it warded off a sick spell. In all my life I have never known any medicine to break up a cold so quickly as Dr. Pierce's Extract of Smart-Weed."

—Mrs. L. E. Lake, 813 Montague St.

RHEUMATISM

Mustarine Subdues the Inflammation and Eases the Soreness Quicker Than Anything Else on Earth.

Pay only 30 cents and get a big box of Begy's Mustarine, which is the original mustard plaster and is made of strong, real, yellow mustard—no substitutes are used.

It's known as the quickest pain killer on earth, for in hundreds of instances it stops headache, neuralgia, toothache, earache and backache in 5 minutes. It's a sure, speedy remedy—none better for bronchitis, pleurisy, lumbago, and to draw the inflammation from your sore feet there is nothing so good. You get real action with Mustarine—it goes after the pain and kills it right off the reel. Yes, it burns, but it won't blister—it doesn't give agonizing pain a snap on the wrist. It does give it a good healthy punch in the jaw—it kills pain. Ask for and get Mustarine always in the yellow box.

PISO'S

Birthplace of Lafayette

Chateau de Chavagnac.

BEFORE daylight on the morning of September 6, 1918, there was an unusual amount of bustle and stir in the little town of Aubiere, a suburb of Clermont-Ferrand, the capital of the department of Puy-de-Dome, in one of the most historic regions of France—the ancient province of Auvergne, says the Christian Science Monitor. What was the occasion which produced all this early morning excitement? Surely no call to battle or no signal to go over the top, because the actual horrors of the world war never extended into this sleepy corner of south-central France; and the American regiment quartered hereabouts was merely passing through the last stages of its preliminary training prior to its triumphant moment of action upon the heights of the Meuse, which occurred during the last days of the war.

It was the one hundred and sixtieth anniversary of the birth of the great Lafayette, and the regimental band of Col. Arthur S. Conklin's Three Hundred and Third heavy field artillery regiment had been invited to share with a few American army officers the honor of representing the American expeditionary forces—yes, the United States of America—at the birthplace and the early home of the great hero who aided so much in the work of winning its independence as a nation. The last bandman had returned from the early breakfast served in the village square of Aubiere, and with his instrument had joined the crowd already climbing into the huge army motor trucks drawn up before the band's billet.

As the first rays of the dawn appeared, and the procession of Aubiere's peasants commenced from the crooked alleyways of the town to the surrounding fields and vineyards, the trucks moved out of the village and over the hill toward Clermont.

After the brief ride through the thoroughfares of the city of Clermont-Ferrand, which was just awakening to the day's activities, the bandmen arrived at the commodious railway station where specially reserved cars on the morning train south awaited them. After the sun was up the train ambled out of Clermont and was soon making its way leisurely through the colorful Auvergne country.

The Setting Supreme.

The day proved to be perfect, warm, and clear; the views from the car windows were entrancing, and the "mademoiselles" tending the gates at each crossing waved their greetings to the groups of young Yankee soldiers which filled the windows of each compartment in the train. The landscape was dotted here and there with the picturesque red-roofed villages, from the center of which rose the gray stone church towers; the countryside seemed to be an immense vineyard filled with endless acres of grapevines; and the mountain peaks, now extinct volcanoes, stood out in bold relief against the clear blue sky like sentinels. Occasionally an old castle ruin frowned upon the travelers from some overhanging cliff or neighboring hillside.

After a ride of three hours, the train passed into the department of Haute Loire and made a short stop at Brionde, where many gayly-dressed country folk with their lunch baskets boarded the cars. A few moments later, the train reached the little village of Paulhaguet, where the order sounded to detrain. After much hurrying and scurrying about at the little way-station, many vehicles of every sort and description were pressed into service for the transportation of the men to their destination. Some rode in autos, some in carriages, and a bass tuba player with his immense instrument was obliged to ride on the front seat of an outlandish coupe, by the side of the driver. The horse was not fleet-footed; and the tuba player reached the Chateau de Lafayette nearly an hour later than the other bandmen, who had watched the great bell of his brass born dazzling in the sun's rays, slowly making its way up the mountain road several miles below.

Fine Ride to Old Castle.

And what a ride it was! what superb scenery and glorious country, picturesque, mountainous! It seemed difficult to believe that a land of such overwhelming beauty in summer could

in winter be transformed into a wild, bleak region known as the Siberia of France. It was a great day for the young Americans; a most delightful diversion from the daily routine in Aubiere, marching drills and drills in the uncomfortable gas masks, band rehearsals, parades, and reviews, and evening band concerts in the town square.

The Chateau de Chavagnac Lafayette stands upon the crest of a lofty eminence commanding a magnificent view of the beautiful Auvergne country; miles and miles of verdant fields and woods stretched far away to a distant horizon flanked with long ranges of majestic hills and mountains. The grounds of the chateau are spacious and attractive, and the little village of Chavagnac adjoins the estate on one side, while the other three sides are open to the distant view. The old castle itself, flanked on two sides with large round towers, presents a strikingly medieval appearance; long rows of French windows are built across the upper portion of the front of the building, and large portholes are seen on each side of the small main doorway.

The castle was built in the fourteenth century, burned in 1701 and rebuilt, as nearly like the original as possible, before Lafayette's birth, on September 6, 1757. The family records date back to the year 1000, when "a certain man by the name of Motier acquired an estate called Villa Faya, and thereafter he became known as Motier de la Fayette," according to Martha Foote Crow in her biography of Lafayette.

The great hero is a direct descendant of Pons Motier and the noble Alix Brun de Champetieres who were married in 1240, and according to the old parish register in Chavagnac Lafayette's full name was Monseigneur Marie-Joseph-Paul-Yves-Roch-Gilbert Dumotier de Lafayette. Here, in this grim old castle, the Marquis de Lafayette spent the first 11 years of his life; and in later years the hero returned to his birthplace after his triumphant career in America and lived here for a time with his family. He instituted various kinds of reforms on his estate and in the villages adjoining; and all of the work for the people of his native town was for their betterment, their enlightenment, and emancipation. The peasantry were greatly attached to him.

The later years of Lafayette were spent at his wife's estate, La Grange, 40 miles east of Paris.

The latter part of the forenoon of this anniversary day in 1918 was spent in looking over the estate and neighboring village. The bandmen were conducted through the chateau, saw Lafayette's own room and what few relics are to be seen, including a peculiar looking article of furniture designated as his bathtub. Many of the American boys wandered through the quaint, picturesque village, visited the venerable parish church and purchased beautiful lace work made by the women of the town to send home to their friends.

Crowds of French people arrived on the scene with their lunches, making the affair an out-of-door picnic, as is their usual custom. At noon a sumptuous dinner was served to the bandmen in the chateau itself, and in the afternoon the celebration took place on the broadly-sweeping lawn in front.

It was a brilliant scene. The band rendered a splendid concert, and its leader, Arthur Shepherd, was presented with a bouquet. In reply to the presentation speech Mr. Shepherd thanked the donors and expressed the honor which he and his men felt at being present at such an event. Many distinguished people, including French and American army officers, were there. Later in the day the bandmen were conveyed back to Paulhaguet, where they boarded the train as the sun was setting over the hills, and reached Aubiere late in the evening with the beautiful day a never-to-be-forgotten memory.

Kept Guessing.

"When you see a man doing some fool stunt on the street nowadays," remarked the Observer of Events and Things, "you can never tell whether he's doing it on a bet or is working for some moving-picture concern."

CURRENT WIT and HUMOR

BIG UNDERTAKING.

"Few people realize the broad expanse of our nation's territory." "Sometimes," commented Senator Sorghum, "I wonder if the expanse is not almost too broad. It is very difficult to cover all the points you would like to include in a speechmaking tour."

Joyous Generalities.

"I don't believe people fully understand what you mean by a soviet government."

"They are not supposed to understand it," replied the agitator. "When people fully understand a proposition like that they are almost certain to pick out objections to it."

Illogical Treatment.

"Ma, why do people talk about the cream of things?"

"Because the cream of a thing is always considered the best, my son." "If cream is the best, then why do they whip it?"

An Elaborate Dinner.

"Was it a good dinner?" "Splendid. All the time I was at their table I kept thinking that they were serving us food far more expensive than they could afford."

Obedying His Wishes.

Jim—And now that we are engaged let's keep it a secret for several months, dear.

Julie—Of course, Jim. I'll tell everyone that.

A Considerable Genius.

Miss de Jones—Are you musical, Prof. Paddyrusky? Prof. Paddyrusky—Oh, yes, but if you want to play don't mind my feelings?

EARLY SYMPTOMS.

"I'd like to see that office boy of mine thirty years from now."

"Why so?" "He ought to make a wonder as a tired business man."

Undisputed Autocrat.

To the most eminent of men Of strength there comes a loss, Which makes him own that now and then The doctor is the boss.

Demonstration.

"Straws show which way the wind blows." "Nobody needs to be told that who has ever chased his hat up the street."

Hard-Boiled Economy.

"You used to take your eggs soft-boiled." "Eggs were less expensive then. Just now nobody can afford to risk spilling any part of one."

Joys of Economy.

"Why do you smile when the high cost of living is mentioned?" "I am thinking of the large amount I now save every time I forego a needless expenditure."

The Mind of a Motorist.

"What do you regard as the most important of our railroad problems?" "Beating an express train over a grade crossing," answered Mrs. Chuggins.

The Logical One.

"I wonder if it is dark inside the big airships?" "Why, don't they always have a skylight?"

Its Sort.

"What's oral surgery, pa?" "I guess it is the kind that mends a man's speech."

Experience.

First Shum Mother—Haven't those settlement girls nerve to come and tell us how to take care of children?

Second Ditto—I should say. Here I've nursed seven through everything a baby kin have and buried five of 'em.

His Failure.

"The bad orator is a man who does evil with a good intention."

"How do you make that out?" "Because he often murders a good speech while trying to deliver it."

RARE DOUBLES TO MONARCHS

Resemblances, Fancied and Real, Have Given Rise to Some Highly Imaginative Stories.

Most monarchs possess at least one double, but so far the double of the present shah of Persia has not been discovered. His grandfather, Nasr-ed-Din, had a famous double in the person of Edmund Yatee. The resemblance between these two was so striking that Yatee's photographs were sold in Brussels as the shah's when Nasr-ed-Din visited that city. However, he never suffered through the possession of a double as another monarch did, if we may credit a theory of Andrew Lang's. According to that ingenious historian, Queen Elizabeth and Darnley were doubles. The second husband of Mary Queen of Scots was not, as is generally supposed, blown up in the explosion of Kirk o' Field, but escaped into England. He then somehow got Elizabeth at his mercy and ultimately secured her throne, posing as the queen to the end of his days. Thanks to the amazing resemblance between the two, the imposture was not discovered until after Darnley's death.—Manchester Guardian.

Most He Could Say.
"Your daughter is learning to play the piano, isn't she?" "Er—well—she's practicing."

The recipe that calls for yeast takes the cake.

Case of Wait.
"Do you believe in long engagements?" "No, but where you gonna find a flat?"

RECIPE FOR GRAY HAIR.
To half pint of water add 1 oz. Bay Rum, a small box of Barbo Compound, and ¼ oz. of glycerine. Apply to the hair twice a week until it becomes the desired shade. Any druggist can put this up or you can mix it at home at very little cost. It will gradually darken streaked, faded gray hair, and will make harsh hair soft and glossy. It will not color the scalp, is not sticky or greasy, and does not rub off.—Adv.

MADE HIS ARGUMENT GOOD
Small Johnny Drew on Biblical Knowledge to Convince Mother of Danger He Was In.

Ten-year-old John lives next door to a little girl near his own age. The mothers are good friends and assist on their children being playmates. But this doesn't suit John, who wishes to get out with the boys. So he tries his best to start a quarrel whenever play-time with Edith arrives. And the explanations for this trouble, which he offers to his mother are often elaborate.

Last Wednesday he had succeeded in making Edith angry. Like a little fury she flew at him and pulled his hair. Then John went home to make the announcement that no longer would he play with this girl. "I can't—that's all," he ended. "It's dangerous for me."

His mother smiled. "Oh, I think not," she comforted. "It isn't such a calamity to lose a few hairs." "Well this is just the beginning," John returned, "and remember what happened to Samson just on account of a woman."

A girl doesn't mind her rival's being exasperatingly clever if she is also consolingly ugly.

Politics is generally the defense when it is an offense.

MOKENA NEWS

Mokena, Jan. 9.—The Rock Island railroad is installing a wonderful new safety appliance on its lines. A force of men are engaged now in installing the new device. At each block sign a strip of metal runs alongside the rails and is connected with the block signal, all being electrically charged. All engines have a contact switch attached to the pony trucks which come in contact with the metal strip in case the signal stands at caution or danger and through the medium of a magnet the air brakes are applied and the speed of the train is reduced to eight miles an hour. In order to release the brakes the engineer must stop and press a button which releases the brakes. If in starting up the engine goes beyond eight miles an hour while the signal is still at caution or danger the air is again applied automatically and the speed reduced to eight miles an hour. As soon as all danger is out of the block the train can pick up speed.

The new device is said to be one of the most important safety appliances adopted by railroads. The same system is in use by some of the other roads.

ENTERTAINERS TO GIVE DANCE

The Mokena Entertainers will direct a dance at the Mokena hall Saturday night this week. These dances are well patronized and are quite successful.

ANNUAL STOCKHOLDERS' MEETING

The annual meeting of the stockholders of the Mokena State bank will be held Wednesday, January 14. The annual election of a board of directors and officers will be held.

RECOVERING FROM BLOOD POISONING.

Miss Hazel Klose, daughter of Mr. and Mrs. George Klose, has been suffering with a severe case of blood poisoning as a result of having a fluge squeezed in a door. She is improving at latest reports.

J. J. GROGAN CENSUS ENUMERATOR.

J. J. Grogan, census enumerator for Frankfort township, began his laborious duty of taking the census Friday, starting out with some Mexican. They proved to be pretty hard information as to their families, etc. Mr. Grogan thinks it will take him a month to complete the job.

Mrs. M. Butz, who was recently stricken with a paralytic stroke, is somewhat improved.

J. W. Jackson, who has been ill for some time, is not showing much change in his condition.

The Mokena Public school started again Monday after being closed during the holiday week.

Mr. and Mrs. Fred Hunt entertained the latter's parents, Mr. and Mrs. Fred Warning of Frankfort and her grand father, Thomas Kinley on New Year's day at dinner.

Mrs. Sadie Grogan has been visiting with Chicago relatives the past week.

Mr. and Mrs. Lowe have moved into the vacant rooms in the Jackson residence the past week. Mr. Lowe is employed in Chicago.

Mrs. John Cappel, mother of Mrs. W. H. Bechstein, who has been ill for some time, is somewhat improved. She has been staying with Mrs. Bechstein since she has been ill.

The officials of the St. John Evangelical church voted to increase the salary of Rev. Wm. Kreis \$200, making his yearly salary now \$1500.

Squaring It.

Some people do odd things for the purpose of getting even.

FOR SALE.

A fine home in Marley with five large lots, on Maple street; hard roads to Joliet and all other points; 7-room house with large basement and cistern, nearly new—built in 1909. A large barn 14 ft. by 16 ft. Garage, Cement Sidewalks and a good drilled well. This is an ideal place for raising poultry, garden truck, etc. Price \$2300.00; easy terms.

GEO. J. HACKER,
Mokena, Ill.

CELEBRATE SILVER WEDDING

A company of relatives gathered at the home of Mr. and Mrs. Cooper Friday, January 2nd to remind them of their twenty-fifth wedding anniversary. The evening was spent socially following which a luncheon was served, covers being laid for fourteen guests. Mr. and Mrs. Cooper were presented with a set of silver ware. The out of town guests were: Mr. and Mrs. Edwin Cooper of La-Grange, Illinois.

ENTERTAIN IN HONOR OF A FRIEND

The Misses Dorothy and Marguerite Wachter entertained Sunday in honor of their friend, Miss Dorothy Ryan of Chicago. Games and other amusements made up the pastimes. Refreshments were served and all report a very pleasant time.

HONORED ON BIRTHDAY

Mrs. Schmidt was surprised one night last week by a company of relatives and friends in honor of her birthday anniversary. She was presented with a beautiful mahogany mantle clock.

FOR SALE.

I have for sale 160 acres of Virgin Central Kansas Land, unimproved. For further information address Peter W. Heintz, Box 193, Blue Island, Illinois.

HOLD WATCH NIGHT PARTY

Miss Hazel Klose entertained a company of friends at her home at Watch Night Party New Year's eve.

ANNUAL CHURCH MEETINGS

The annual congregational meetings of the St. John German Evangelical church was held Friday morning. There was a fine attendance and the meeting was a very harmonious one.

A committee was appointed to look after the new church proposition. This committee is to secure data as to costs of building, plans, etc. They will visit other churches in different cities and towns in order to get an idea of just what is needed. Resolutions were passed setting forth the specific reasons why a new edifice is needed.

The following church trustees were elected for the following year: Herman Wodrich and Henry Schoeneck. The total funds which have been for the new church totals \$19,000.00.

LUTHERANS HOLD MEETING

The annual congregational meeting of the Immanuel Lutheran church was held the latter part of the week. George Stellwagen was elected trustee, succeeding Henry Yunker.

PULLING HEDGE.

Charles Bostrom has had the hedge on his farm pulled out with steam engine power the past week. A large amount of hedge has been removed.

Card of Thanks.

I wish to thank my friends for their kindness and gifts to me during the holiday season, and I wish them much happiness and prosperity during the year.

MRS. JOHN SEMMLER,
Mokena.

New Lenox Gets Presidency

The Will County Farm Bureau, incorporated, affiliated with the Illinois Agricultural Association, was re-organized and elected its officers and advisory committee last Saturday. Its 1400 members in the county were well represented by members from every township.

A nominatory committee was elected at the morning session which consisted of: Boardman, chairman; Wheatland; James Frazer, Home; George W. Maue, Frankfort; Francis, New Lenox; and Frank Sprague, Lockport.

This committee reported in the afternoon, placing in nomination of officers who received the unanimous approval of the meeting. The officers elected are as follows:

President—G. L. Francis, New Lenox.

Vice-Pres.—G. W. Maue, Frankfort
Recording Secy.—Arthur States
Bewod.

Treasurer—G. W. Nese, Wilmington.

Directors of the executive committee: Wm. Webb, Lockport; N. J. Vetter, Homer; J. L. Wilhelm, Joliet; H. N. Gilkerson, Peotone; Herman Heinze, Washington.

The constitution and by-laws were revised to provide for an advisory council of members appointed by each township. Should a township fail to appoint a representative within thirty days, the president will appoint a member from such township.

Addresses were made by Franklin Hedgecock of Albert Lea, Minn. who was a candidate for Farm Advisor; C. H. Root, Grundy County who was formerly Supt. of Schools of that county; C. J. Cooper of Sycamore, Ill.; August Maue, Supt. of Schools of Will county; J. D. Bilsboman of the Agricultural Extension Department of the University of Illinois. These talks were all short but spirited. The meeting was presided over by the former president, John L. Keniston.

The Will County Farmers' institute will hold its thirty-eighth annual gathering in Beecher February 4, and in Joliet, February 5th, 6th and 7th. The News-Bulletin job department is at work on the program now. A very excellent program has been prepared and will contain many special features. Watch for the full detailed program in next week's issue of the News-Bulletin.

Three-Rail Switches.

Australian engineers have invented these three-rail switches for use by railroads where three rails are laid in each track to accommodate rolling stock of different gauges.

The Entertainers.

There will be a dance given under the auspices of The Entertainers, at Mokena hall, January 10, 1920. Don't forget to attend. The usual good time promised. Everybody invited to attend.

Do It Today.

NEVER MIND THE EXACT FIGURES, but it is time that many thousands of men that reach fifty years leave no estate whatever—except life insurance. Are you going to be one of the very few that succeed. Take out a policy and be safe with your family. Do it today.

FRED GOEBEL, Agent.

WHERE NATIONAL MOTORTRUCK SHOW WILL BE HELD

Above is shown a picture of the International amphitheater, Chicago, where the mammoth Motortruck show will be held the week of January 24-31. This enormous structure is the largest in this country used for show purposes, covering acres of ground. The recent International Live Stock exposition, with its record-breaking entry list of 9,000 individual animals, was held at the International amphitheater. The building is so large that they stage regular football games inside, and there is room left for 10,000 spectators. This does not include the space in the wings.

NOTED MEN TALK AT TRUCK SHOW

Conferences at National Motor Truck Exposition at Chicago Jan. 24-31, Great Feature.

CABINET MEN ON PROGRAM

Senators and Governors Accept Invitation to Speak—Movies Will Be Employed.

That the Highway Transport conferences, to be held in conjunction with the National Motortruck show at Chicago, January 24-31, will be the most comprehensive and important yet held, is indicated by the announcement just made of the subjects to be discussed and a partial list of those who have accepted invitations to speak.

The feature of the conference sessions will be the liberal use of illustrations, both in the nature of stereopticon slides and motion picture films. An added feature will be motion picture shows, lasting one-half hour or more, and following the sessions, each afternoon and evening. For these "movies" a large number of films, dealing with motor transportation in all of its varied phases, are being collected. Several are being secured from abroad. Dr. Francis Holley, director of the bureau of commercial economics at Washington, is co-operating in collecting interesting films having to do with highway transportation by motor vehicles.

The conference will open on the evening of January 24 in Chicago, with important inaugural sessions. Invitations to speak at these inaugural sessions have been extended to members of the president's cabinet, United States senators and governors of different states, and already several have accepted.

Among those who will speak at the Highway Transport conference on subjects having to do with highways and highway traffic are Arthur Blanchard, professor in charge of highway engineering and highway transport, University of Michigan and president of the National Highway Traffic association; F. G. Thompson, highway engineer, state of New Jersey; M. O. Eldridge, director of roads, American Automobile association; Harry S. Quinn, Goodyear Tire and Rubber company; Robert C. Hargreaves, Goodrich Tire & Rubber company; Pyke Johnson, secretary of highways committee, National Automobile Chamber of Commerce; George C. Diehl, chairman of good roads board, American Automobile association; J. E. Pennypacker, and S. M. Williams, chairman of the Federal Highway council.

Authorities on motor express operation, including intercity motor haulage and rural motor express, who will speak at the conference, include Tom Snyder, secretary of highway transport division, Indianapolis chamber of commerce; Professor Boyle of Cornell university; J. D. Eggleston, chairman of highways transport committee of Iowa; F. W. Fenn, secretary of motortruck committee, National Automobile Chamber of Commerce; E. E. Peake, secretary of Kansas City Motorcar Dealers' association; George D. Wilcox of Commerce Motortruck company, and E. A. Williams, Jr., of the Garford Motortruck company.

The various subjects having to do with the actual operation of motortrucks, especially from the standpoint of efficiency, will be discussed by such well-known authorities as W. J. L. Banham, general traffic manager of the Otis Elevator company; Roderick Stephens of the Stephens Fuel company; George H. Pride, president of Heavy Haulage company; W. H. Kennedy, transportation engineer; Joseph Husson, editor of Commercial Vehicle; Walter Wardrop, editor of Power Wagon; George W. Veale of Timken-Detroit Axle company; Ralph C. Rogan, president of Service Managers' association of New York; H. E. Merithew and H. W. Drew, transportation experts of the Packard Motorcar company; T. M. Knight of Armour & Co.; E. E. LaSchum, general superintendent of the American Railway Express company, and Walter M. Ladd, service manager of the Pierce-Arrow Motorcar company.

THOUSANDS OF FARMERS TO ATTEND TRUCK SHOW

Rural Districts, Where 78,000 Motortrucks Are in Use, to Be Represented at Chicago.

While thousands of merchants, manufacturers, dealers and others interested in motor transportation are going to Chicago from all parts of the country for the national motortruck show, to be held in the International amphitheater, January, 24-31, the interest already displayed by farmers in the show indicates that a very large portion of the visitors will go from the rural districts. They are going not only to see the several hundred trucks to be exhibited by leading manufacturers, but also to attend the big transportation conference which will be a feature of the show.

Farmers are the greatest truck users in America, and it is but natural that they should be interested in this monster truck exposition and conference. Last year more than 78,000 trucks were used in hauling farm products. In the past farmers were discouraged from producing anything that they could not sell in large quantities and from attempting to market the surplus of perishable products they may have had above their own needs because they lacked means of transportation. Today all this is changed through the use of the motortruck.

Motor transportation has furnished a reliable and adequate means for the production of large quantities of products at a small cost of shipping. The motortruck furnishes rapid transportation for the farmer and brings products to market in condition to command the highest prices. It saves time and labor of men and it permits profitable expansion of side lines, furnishing wider marketing area. Not only in the delivery of garden products, but also in the matter of delivery of dairy products and live stock has the motortruck proven its worth on the farm.

It was Herbert Hoover, who said that 50 per cent of perishable foodstuffs in this country could not leave the place where it was grown because producers are too remote from markets. With the motortruck at the command of the producer there is little reason for permitting foodstuffs to rot in the field for lack of transportation. The success of the motortruck in the rural districts, however, depends to a very large degree on the character of the roads. Bad roads increase the operating costs. At the motortruck conferences the subject of good roads, motor express, trucking efficiency, and practically all of the problems that confront the operator, user and owner will be discussed by experts. Conference sessions will be held each afternoon and evening.

RURAL MOTOR EXPRESS DISCUSSED AT CHICAGO

Announcement has been made that the program is practically completed for the Highway Transport conferences to be held in conjunction with the National Motortruck show at Chicago during the week January 24-31 in the International amphitheater. Inaugural sessions of the conferences will take place on opening night when the speakers will be men of national prominence and the general subjects of highways and motor transportation will be discussed with special reference to the economic aspects. Afternoon and evening sessions will be held daily during the remaining six days of each show. Afternoon sessions are intended primarily for those engaged in the motortruck business including manufacturing, distributing and service. Discussion will center upon such subjects as merchandising and advertising, legislation for highway improvement, sales plans, service, the motor transportation idea, and opportunities in rural sections. Development of the rural motor express is proceeding rapidly as a result of the need to increase production and decrease cost of food. Perishable products may be brought to market in good condition and small farmers are combining in co-operative associations for using a single truck to haul food products to cities and bring back supplies on the return trip.

Farmers' motor haulage problems will be discussed at the conference sessions by men who have qualified in this particular field, including Senator Capper of Kansas, A. R. Kroh of the Goodyear Tire and Rubber company, E. T. Meredith, publisher of Successful Farming, and Raymond Olney, editor of Power Farming.

Among those prominent in the motortruck industry, who are on the conference speakers' list are: F. W. A. Vesper, president of the National Automobile Dealers' association; Robert O. Batten, truck sales manager of Pierce-Arrow Motorcar company; J. W. Allen, Eastern branch manager of Service Motortruck company; David C. Fennier of International Motor company; Ray Sherman, editor of Motor World, and half a dozen or more dealers from various parts of the United States, who have achieved unusual successes in marketing motortrucks. Included are men who are successful in selling what might be termed complete motor transportation, including motortrucks, trailers, passenger cars and aircraft.

One of the most vital phases of motor transportation at this time is that generally classed under the heading "legislation." Among the speakers on this particular subject are Charles Thaddeus Terry, counsel to the American Automobile association, National Automobile Chamber of Commerce and other organizations; Charles S. Bond, counsel for the Motortruck Association of America; Harry Meixell, Jr., secretary of the legislative committee National Automobile Chamber of Commerce, and E. E. Ertzman, executive secretary of the Motortruck Owners' association.

The program of the highway transport conference provides for an inaugural session on the opening night at Chicago, when the speakers will be men of national prominence, and the general subjects of highways and motor transportation will be discussed in a broad way, with special reference to the economics involved. During the remaining six days of the show conference sessions will be held in the afternoons, primarily intended for those engaged in motortruck business, including manufacturing, distribution and service, and in the evenings, primarily for motortruck owners, operators and for shippers and any others interested in motor transportation. However, all sessions are open to the general public and every one is cordially invited. On the closing day of the show there will be a single joint session in the afternoon.

There is a general title for each session and two or three subdivisions, each with its own subjects.

AFTERNOONS.

Monday, January 26—"Merchandising Motortrucks," "The Trade Segregation Plan," "Effective Advertising," "The Farm Field."

Tuesday, January 27—"Selling Motor Transportation," "Handling Motor Trucks and Passenger Cars Together," "Offering a Complete Transportation Line."

Wednesday, January 28—"Selling on the Firing Line," "Proven Sales Plans," "Developing Prospects," "Promoting Rural Motor Express and Other Enterprises."

Thursday, January 29—"Promotion of Highways and Traffic," "Taking an Interest in Legislation." (This session under direction National Highway Traffic association.)

Friday, January 30—"In the Matter of Service," "The Truck Owners' Viewpoint," "The Truck Dealer's Plan," "The Manufacturer's Policy."

EVENINGS.

Monday, January 26—"Motortruck and Railroad Freight," "Cost and Service Comparisons," "Economic Range of the Motortruck."

Tuesday, January 27—"The Farmers' Haulage Problems," "The Horseless Farm," "Connecting Farms and Markets," "Farm Power."

Wednesday, January 28—"Rural Motor Express," "Its Opportunities as an Investment and Business Career," "Its Advantages to the Shipper," "Its Benefits to the Producer and Consumer."

Thursday, January 29—"Highways and Motor Transport," "Relation of Roads to Operating Cost," "Progress in Highway Improvement," "Constructing Roads for Motortruck Traffic."

Friday, January 30—"Increasing Motor Haulage Efficiency," "Cost Accounting, Routing and Dispatching," "Loading and Unloading Devices," "Incentives for Drivers and Helpers."

Saturday, January 31—"Aids to Motortruck Efficiency," "Trailers," "Pneumatic Tires."

TWO GREAT SHOWS HELD AT CHICAGO FOR AUTO USERS

Passenger Cars and Motortrucks Will Be Displayed During Week of Jan. 24-31.

PARADE MILES LONG FEATURE

Millions Spent for Trucks Indicates How Extensively This Industry Has Grown.

Chicago will be the heart of the passenger car and motortruck world from January 24 to 31, when the two colossal shows are held there. The city has the well-merited reputation of staging big expositions on a larger scale than are held anywhere else.

Just as the recent International Live Stock exposition was by long odds the most remarkable event of its kind, not alone in the size and quality of the exhibits, but also in the enormous attendances, so the coming Passenger Car and Motortruck shows are expected to be the greatest in the history of these mighty industrial classics.

This winter they will be held simultaneously, but at different headquarters. The Passenger Car show will be put on at the Coliseum, the Coliseum Annex and the First Regiment Armory; the Motortruck show will be housed at the International amphitheater. Forty-second and Halsted streets.

Last year the Motortruck show followed on the heels of the Automobile show, at the same buildings, necessitating either a long stay in the city by out-of-town visitors, or two trips. This has now been obviated, and those interested can take in both events on the same day, making as many journeys back and forth as they desire.

The Motortruck show will without doubt be the biggest thing of its kind on record, and will be national in every respect. Last winter the exposition was a surprisingly complete one, considering the fact it was put on by local dealers.

Manager Samuel A. Miles gave his services to help make it a success, and it far surpassed the fondest hopes of those behind it.

Mr. Miles will again be in charge, and it will be staged under the direct auspices of the National Automobile Chamber of Commerce. Already a large percentage of the floor space has been asked for by motortruck owners and by the accessory people.

A feature of opening afternoon, Saturday, January 24, will be a great street parade, which will be the most spectacular event in connection with motortrucks ever held. This will go through the streets of Chicago, and all sorts and fashions of motortrucks will be on public view—from the tiny delivery wagons up to the "motor dreadnaughts."

Early in November, Manager Samuel A. Miles met in Chicago with the local motortruck dealers, at which time the plans were outlined. In addition to Manager Miles, there were present John Eustice, in charge of the conference programs, and F. W. Fenn, in charge of rural motor express promotion of the National Automobile Chamber of Commerce. John Nicol, chairman of the Chicago Automobile Trade association, presided.

Since that time plans have matured, until now there is every confidence that the world's greatest motortruck exposition will be seen during "Automobile week."

Manager Miles, at that time, spent a couple of days looking over the schemes for decorating the vast buildings, which is a gigantic task in itself. Tons and tons of decorations will be used, and this feature in itself will be well worthy of a visit. Men expert in vast decorative spectacles have been working on the details.

Those who are not intimately acquainted with the motortruck industry would be amazed to learn how rapidly this particular phase of industry has grown the past few years. From a mere infant, it has sprung into monumental aspects, and today one is forced to speak in terms of millions instead of hundreds.

Every phase of the motortruck will be on view at the International amphitheater, which building is peculiarly well suited for such a show.

Statistics show that there is \$7,000,000 invested in motortrucks by coal dealers; \$3,400,000 by grocers, \$1,500,000 by milk dealers and creameries, and \$4,000,000 by lumber men.

It has been estimated that 435,000 motortrucks are now being used, as against 411 in 1904; 4,500,000 tons daily on the average are being hauled, with a saving in transportation costs of \$236,000,000.

One of the unique and important features of the National Motortruck show will be the monster transportation conferences, which will be a daily part of the program. Every angle of motor transportation will be discussed, including the subjects of the merchandising of motortrucks, service from all angles, proven sales methods, operating costs, good roads and, in fact, every conceivable angle which bears on motortrucks.

John R. Eustice, who is in direct charge of the conferences, and who attended the November meeting in Chicago, says that he has received hundreds of inquiries from shippers,

A Ford Radiator that will not boil

The only Ford radiator made that is guaranteed not to over-heat—not to burst from freezing and to be free from mechanical effects of any kind.

The Lober

Non-Bursting Radiator

The manufacturer will repair or replace Free of Charge any defective radiator or any radiator in which the core bursts from freezing. The manufacturer puts a guarantee tag on every radiator—you are fully protected.

LAMBS FATTENED FOR MARKETING

From 3 to 5 Months Is About Right Age Under Ordinary Farm Conditions.

MAKE HIGHER RATE OF GAIN

During Heat of Summer They Are More Liable to Losses From Parasites—Breeder Also Gets Use of His Money Earlier.

Under ordinary farm conditions lambs should be made ready for market at from 3 to 5 months of age. When young they make a higher rate of gain and will put on the same amount of flesh for less cost than when they are older. Then, too, they will make but small gains during the heat of summer, and at this time parasites are most troublesome and they are thus more liable to losses from this cause. Risk of accidents is always higher when the lambs are held for a long time. More feed is saved for the breeding flock, and less labor is needed if the lambs are sold early. Better prices are obtained in the spring because of not having to meet the competition of the western lambs that are marketed during the summer and fall, and in addition the grower gets the use of his money sooner by pushing the lambs to a marketable condition as fast as possible.

Teaching Lambs to Eat.

Every effort should be made to keep the lambs growing from the start. The first essential is to teach them to eat. Liberal feeding of lambs dropped before pastures are ready is profitable under any ordinary grain prices. This is best done through the use of a small inclosure known as a "creep," to which the lambs have access at all times, but into which the ewes can not come. The creep should contain a rack for hay and a trough for grain, so arranged that the lambs can not get their feet into them.

All feed given, especially ground feed, should be clean, fresh, and free from mold. The lambs will begin to nibble at the feed when from 10 to 16 days of age. Pea-green alfalfa of the second or third cutting is one of the most relished feeds. Flaky, sweet bran probably ranks next. For the first few days these are the ideal feeds. A little brown sugar on the bran at

HANDY RACK HANDLES EVERYTHING ON FARM

Especially Useful in Carrying Crops to Market.

No Danger of Load of Produce Slipping After It Has Been Placed Inside of Boards—Big Saving Made in Hauling Seeds.

Several farmers here have a handy rack for handling almost everything on the farm. Especially are they meant for crops which are taken to the market or cellar in crates or boxes. The best and cheapest one I have seen is 14 feet long, 6 feet wide with sideboards 14 inches high, writes H. E. Rogers of Ohio in Farm and Home. The floor is solid of matched lumber one inch thick. The two stringers which run lengthwise are 4 1/2 by 6 1/2 inches and 14 feet long.

Around the outside there is a piece 2 by 2 which is used for holding the sideboards in place when they are wanted. Along the sides there are four holes in the floor next to the stringers, which take one-half inch iron bolts fastened to the bottom of the

Convenient Wagon Rack.

sideboards. This makes everything hold solid and there is no danger of a load of produce slipping after it is inside the boards. The side and end boards are held together by a short rod bolted on the end boards with a ring in the end. Another bolt comes through the side board with a hook in the end of it. These two join and are easily turned up tight.

On this rack, with no sides on, we hauled onions, and put on 78 bushel crates. This rack on a low wagon is hard to beat. There is hardly a place where either a rack or a box is used that this sort of rack will not do the business of both. When thrashing there is a rack with no holes to let your legs down through when you don't look where you step. In hauling seeded grain, such as clover, a tight rack means a mighty big saving in the seeds that are bound to shell.

ATTENTION TO DISK HARROW

Implement Should Be Gone Over Carefully During Winter Months and Put in Order.

(By L. B. BASSETT, University Farm, St. Paul, Minn.)

The disk harrow is a tillage tool found on nearly every farm. Its useful life is about 20 years, as shown by carefully compiled statistics. Thus it is a long-lived tool. There is very little about a disk to wear out. It has few moving parts and, if given good care, should cause little bother.

Disks should be gone over carefully every season. During the winter months the boxes should be taken apart, carefully cleaned and, if badly worn, replaced. See to it that the oiling system works and that the bearings are getting oil. Keep the arbor bolt tight. This holds the disk firmly in place.

If the disk is used much it should be sharpened at least once each season. This greatly increases the penetration and decreases the draft, as it will do more work with less set. It will also do better work; and because it does not need so much angle or set, there is less strain and wear on the boxes. While a dull disk will cut, it is like a dull ax, inefficient and expensive to work with.

FEEDING SKIM MILK TO PIGS

Resume of Many Tests Made for Purpose of Ascertaining Most Economical Method.

A good many tests have been made for the purpose of ascertaining the most economical way of feeding skim milk to hogs. A resume of the work done along this line at the Indiana, New York, Iowa, Wisconsin and Ontario experiment stations shows that young pigs, that is, pigs weighing less than 100 pounds, may be fed as much as three pounds of skim milk per pound of grain, and by grain we mean any one of the cereals fed singly, or a number of them together. As pigs grow older the amount of skim milk should be reduced to about two pounds per pound of grain. The reason for this is that less protein is required as the pigs grow older and still less is required during the fattening period.

KEEP DAIRY COWS SANITARY

Appearance of Animal Is Accurate Measure of Owner—Customers Should Be Safeguarded.

Pride should compel every dairyman to maintain his cows in an attractive and sanitary condition every day in the year. In a way the appearance of the cow is an accurate measure of the owner. In the same degree that neglected fences, over-run fence rows, tumble-down buildings and abandoned machinery typify the careless ne'er-do-well farmer, dairy cows which are dirty indicate the milk farmer who does not safeguard his customers.

BLACK LOCUST RECOMMENDED FOR WOODLOT

Black Locust Plantation, Trees Five Years Old.

(Prepared by the United States Department of Agriculture.)

Black locust—known also as "yellow" locust—is one of the most profitable and useful kinds of timber for the farm. The wood is heavy, hard, and particularly durable when used in the ground. For use as fence posts, black locust is long-lived and very desirable. Only one other wood gives longer service, namely, usage orange or "hols

Black Locust Utilizing Rocky Places on Farm Are Indications of Good Soil.

(Prepared by the United States Department of Agriculture.)

Black locust, although one of the most durable woods when set in the ground, matures early and deteriorates in the tree rapidly if not cut when ripe. Commercially the tree is usually mature in 15 to 25 years.

GOOD TOP DRESS FOR WHEAT

Application of as Little as Two Tons of Manure Per Acre May Increase Yield Ten Bushels.

It pays a big profit to top dress the wheat with manure. An application of as little as two tons per acre may increase the yield ten bushels; at least it has done this much one year with another in Indiana tests. Four tons make only about two bushels more.

The manure benefits the wheat directly through the plantfood which it contains, and indirectly through the winter protection, which often is of greater value. Where manure is used as a top dressing the stand of clover is generally better. There is an organic benefit from the manure which is considerable and is not so easily explained. Where as much or more plantfood is applied in the form of commercial fertilizers the resulting yield has not been as large.

CUT STRAW IS BEST BEDDING

Much of Liquid Manure, Now Wasted, Can Be Saved by Use of Effective Absorbents.

A great deal of the liquid manure now going to waste can be saved by the use of absorbents, such as straw, sawdust, muck and loam. Uncut straw is a very valuable absorbent, taking up two or three times its weight of water, while fine cut straw will absorb six or nine times its weight of liquid. Moreover, oats straw contains quite a large amount of plantfood, especially potash.

BUYING SMALL FARM TOOLS

Time and Money Can Be Saved by Making Purchase on One Order—Give Systematic Care.

(Prepared by the United States Department of Agriculture.)

If possible all small tools for the farm should be purchased on one order. This will save time and, usually, money. Also, it will entail a total expenditure sufficiently large to impress the farmer with the importance of giving systematic care to his small tools.

out field in middle Tennessee which 20 years previously, had been planted with one-year-old locust seedlings, yielded fence posts worth \$188 an acre on the stump, or \$480 at the railroad about two miles distant. This was a gross return of \$9.40 an acre yearly on a hillside of fairly good soil which before the trees were set out had started to gully badly. Returns of \$5 to \$7 an acre annually have frequently been realized on poor, thin hill land. Good soils underlain with limestone and planted to black locust in the Appalachian and Piedmont regions, from Pennsylvania to Kentucky and Tennessee, can be counted on to yield an average of \$10 an acre yearly at the end of from 15 to 20 years.

The manufacture of insulator pins requires large amounts of black locust, for which purpose it is the most satisfactory wood.

Starting Black Locust.

In starting black locust, small sprouts with a portion of the root may be dug up and used; or, better, the seed may be sown in the spring in drills in good soil, like onion seed. At the end of the season the seedlings will be from two to four feet in height and satisfactory in size for setting out. This may be done in the late fall, but the spring season, about the time growth starts, is preferable. In some regions the locust wood borer is almost certain to cause extensive damage to young plantations unless special precautions are taken to keep the trees in a healthy growing condition and the bark shaded by foliage, either from nearby trees, shrubs, or weeds.

Information on this insect and methods of control will be found in United States Department of Agriculture Bulletin 787, "Protection From the Locust Borer."

(Prepared by the United States Department of Agriculture.)

Strange as it may appear, black locust, although one of the most durable woods when set in the ground, matures early and deteriorates in the tree rapidly if not cut when ripe. Commercially the tree is usually mature in 15 to 25 years.

FEEDING HAY AND ROUGHAGE

Handling and Hauling of Large Bulk May Be Saved by Giving Products to Live Stock.

(Prepared by the United States Department of Agriculture.)

In the marketing of hay and roughage there is a large bulk to handle and haul to the point of delivery. The United States department of agriculture points out that this means much extra labor for the men and teams on grain and crop farms, and much fertility is taken off which might be returned to the fields if the products were fed to live stock.

HOW WHEAT IS DISPOSED OF

One-Half of Crop of 1918 Sold by Farmers in Three Months Beginning With July.

(Prepared by the United States Department of Agriculture.)

Wheat is mostly marketed by farmers soon, or, at any rate, not long, after the harvest. Of the crop of 1918, more than one-half was sold by farmers in the three months beginning with July, and 69.3 per cent in four months. Thereafter the monthly sales dwindled to 1.5 per cent of the year's total in June, 1919.

NICE INCOMES FROM POULTRY

Raising Chickens Has Many Attractions for Those Who Enjoy Association With Fowls.

Poultry raising, like raising live stock in general, has many attractions for those who enjoy the work. Men and women often enjoy association with animals and fowls. There are women making nice incomes from poultry.

KILL GOPHERS IN ORCHARDS

Rodents Delve Deep at This Time of Year and Sometimes Nest Under Cherry Trees.

(Prepared by the United States Department of Agriculture.)

Look out for gophers and get them now. In well-drained orchards they delve deep and nest under the root crown of your best cherry-tree without giving much evidence of it.

POULTRY FACTS

PAINT AIDS POULTRY HOUSE

Adds Greatly to Appearance and Service of Buildings—Whitewash Is Cheapest.

(Prepared by the United States Department of Agriculture.)

Painting adds greatly to the appearance and service of all buildings and appliances. One may buy ready-mixed paints or may purchase paste pigments and oil and mix them. All surfaces should be clean and dry before they are painted. Use a priming coat made of equal parts of paint and linseed oil and cover with one or more coats of paint, which should be thoroughly brushed into the surface.

Whitewash is the cheapest of all paints, and may be used either for exterior or interior surfaces. It can be made by slaking about ten pounds of quicklime in a pail with two gallons of water, covering the pail with cloth or burlap and allowing it to slake for one hour. Water is then added to bring the whitewash to a consistency which may be applied readily. A weatherproof whitewash for exterior surfaces may be made as follows: (1) Slake 1 bushel of quicklime in 12 gallons of hot water; (2) dissolve 2 pounds of common salt and 1 pound of sulphate of zinc in 2 gallons of boiling water; pour (2) into (1), then add 2 gallons of skim milk and mix thoroughly. Whitewash is spread lightly over the surface with a broad brush.

FIND PERFECTLY FRESH EGG

Quality Is Largely Determined by Ease With Which Yolk Moves—Hints on Candling.

(Prepared by the United States Department of Agriculture.)

It is necessary to rotate an egg before the candle if one is to obtain an accurate knowledge of its condition. By tilting at various angles, the location and size of the air space can be seen, and very often the position of the yolk. But the quality of the egg is very largely determined by the ease

A Home-Made Egg Candling Outfit.

with which the yolk moves and the direction of its motion. The operator, therefore—

1. Grasps the pointed end of the egg with the tips of the fingers.
2. Holding the blunt end uppermost, places the egg closely against the opening, or spout of the candle.
3. Gives the egg a quick turn to the right or left, watching the movement of the yolk.

If the egg is perfectly fresh it may be difficult to find the yolk at first glance, but as the egg is turned a glimpse of it will be obtained.

MENU HINTS FOR HENS

(Prepared by the United States Department of Agriculture.)

Use home-grown grains and their by-products supplemented with meat and fish scraps, or milk. Mix these feeds to make a properly balanced ration.

Feed a scratch mixture of whole or cracked corn twice daily. Feed a mash, either dry or wet, made of ground grains and meat scrap.

Make the hens exercise for their feed.

Provide a light feed of corn in the morning, supplying only what the hens will clean up in a half-hour. Give a full feed in the afternoon, especially in cold weather.

MAKE PROFIT FROM POULTRY

No Reason Why More Farmers Cannot Make Money by Selling Breeding Stock and Eggs.

Many farmers are now breeding standard-bred poultry, exhibiting the same, advertising, and making a good profit from the sale of breeding stock, eggs for hatching, etc. There is no reason why other farmers cannot do as well.

NERVOUS PROSTRATION

Mrs. J. Christman Proved That Lydia E. Pinkham's Vegetable Compound is a Remedy for this Trouble.

Binghamton, N. Y.—"I was in a very nervous condition for over a year, my

mind was gloomy, could see no light on anything, could not work and could not have anyone to see me. Doctor's medicine did not help me and Lydia E. Pinkham's Vegetable Compound was recommended. I took it and am now well. I recommend it to all afflicted with nervous prostration."—Mrs. J. CHRISTMAN, 193 Oak Street, Binghamton, New York.

The success of Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, is unparalleled. It may be used with perfect confidence by women who suffer from nervous prostration, displacements, inflammation, ulceration, irregularities, periodic pains, backache, bearing-down feeling, flatulency, indigestion and dizziness. Lydia E. Pinkham's Vegetable Compound is the standard remedy for female ills.

If there are any complications about which you need advice, write in confidence to Lydia E. Pinkham Medicine Co., Lynn, Mass.

HEARTBURN

Caused by Acid-Stomach

That bitter heartburn, belching, food-repeating, indigestion, bloating after eating—all are caused by acid-stomach. But they are only first symptoms—danger signals to warn you of awful troubles if not stopped. Headache, biliousness, rheumatism, sores, that tired, listless feeling, lack of energy, dizziness, insomnia, even cancer and ulcers of the intestines and many other ailments are traceable to ACID-STOMACH.

Thousands—yes, millions—of people who ought to be well and strong are mere weaklings because of acid-stomach. They really starve in the midst of plenty because they do not get enough strength and vitality from the food they eat.

Take EATONIC and give your stomach a chance to do its work right. Make it strong, cool, sweet and comfortable. EATONIC brings quick relief for heartburn, belching, indigestion and other stomach troubles. Improves digestion—helps you get full strength from your food. Thousands say EATONIC is the most wonderful stomach remedy in the world. Brought them relief when everything else failed.

Our best testimonial is what EATONIC will do for you. So get a big 50c box of EATONIC today from your druggist, use it five days—if you're not pleased, return it and get your money back.

EATONIC

(FOR YOUR ACID-STOMACH)

SQUEEZED TO DEATH

When the body begins to stiffen and movement becomes painful it is usually an indication that the kidneys are out of order. Keep these organs healthy by taking

GOLD MEDAL

FRANKLIN OIL CAPSULES

The world's standard remedy for kidney, liver, bladder and uric acid troubles. Famous since 1896. Take regularly and keep in good health. In three sizes. All druggists. Guaranteed as represented. Look for the name Gold Medal on every box and accept no imitation.

Even the biggest fish began life on a small scale.

SHE THOUGHT DYES WOULD LOOK DYED

But "Diamond Dyes" Turned Her Faded, Old, Shabby Apparel Into New.

Don't worry about perfect results. Use "Diamond Dyes," guaranteed to give a new, rich, fadeless color to any fabric, whether it be wool, silk, linen, cotton or mixed goods—dresses, blouses, stockings, skirts, children's coats, feathers, draperies, coverings—everything!

The Direction Book with each package tells how to diamond dye over any color.

The KITCHEN CABINET

Oh, why should the spirit of mortal be proud?
Like a swift-footed meteor, a fast-flying cloud,
A flash of the lightning, a break of the wave,
Man passes from life to his rest in the grave.

MEALS FOR A DAY.

For the first meal of the day, a little fruit of some kind is a good beginning. If fresh fruits, such as oranges, grapefruit, apples or pears are not at hand, a tablespoonful or two of raisins, steamed and added to the oatmeal or cooked cereal, or a few dates, figs or stewed prunes are all good and desirable breakfast fruits.

With an almost endless variety of breakfast foods, one may have a different kind every morning, if the family is large enough to practice this method without waste.

For the hot dish, eggs are always good, and may be cooked in as many ways as there are days in the year. Bacon is a breakfast meat, and if liked can be served daily without losing its charm. Sausage, chops and fish of various kinds are other breakfast meats. Mackerel is a great favorite. When the fresh fish cannot be obtained the salted fish makes a fairly good substitute. Soak the fish over night, or until much of the salt is removed, then bake in the oven for 20 minutes, covered with thin cream. Serve hot with bits of butter.

With toast, cakes, muffins, doughnuts, cookies and good coffee, one may find a choice for the first meal.

For luncheon, one hot dish, which may be escalloped fish, vegetables, rice or macaroni, codfish with baked potatoes, or a cream soup, of which there are a large number from which to choose; a salad, some kind of bread, a cupful of chocolate, cocoa or tea, and a small cake, with or without fruit, such as marmalade or jelly, canned or preserved fruit.

For dinner, a clear soup, if followed by a heavy dinner, a cream soup if a light dinner follows; one vegetable besides potatoes, a roast or meat loaf, a simple dessert, with coffee.

For a course dinner, the cocktail is served as a stimulant; on this account the clam and oyster, the various fruit cocktails and those with appetizing herbs, are used, their object being to stimulate, not cloy the appetite.

Pineapple Cocktail.—For each glass take a tablespoonful each of pineapple and lemon or orange, one-half tablespoonful of grated orange peel. Sweeten to taste, pour over a little chilled ice and fill the glass with iced water.

Many times—in fact, invariably—the mental attitude we take toward anything of an unfriendly nature that enters our lives determines its actual effect upon us.—Trine.

A FEW CREAM SOUPS.

A cream soup is sufficiently nourishing to serve as the main dish at a luncheon. One of the most common is potato, but the following is not common.

Cream of Potatoes.—Boil ten large potatoes and mash with a cupful of cream; season with salt and grated onion. Blend together two tablespoonfuls each of flour and butter; add two cupfuls of cold milk and cook until thick, stirring constantly. Add four cupfuls of boiling veal stock, the mashed potato, and bring to boil. Serve at once.

Veal and Celery Soup.—Cut up three pounds of veal; break the bones; cover with four quarts of cold water and simmer for four hours; strain and return to the fire. Add two bunches of celery, and two chopped onions; simmer until the vegetables are done. Press through a fine sieve; thicken with two tablespoonfuls of cornstarch mixed with two cupfuls of milk; add two tablespoonfuls of butter in small bits; reheat and serve with dice of fried bread.

Cream Veal Soup.—Chop fine three pounds of lean veal and one large onion. Cover with two quarts of cold water; simmer three hours; strain, cool and skim. Thicken with two tablespoonfuls of flour blended with a little cold milk beaten with three eggs and two cupfuls of milk. Season with salt, pepper, minced parsley, and a grating of nutmeg.

Egg Soup.—Butter six slices of stale bread; sprinkle with sugar and brown in the oven. Reheat two cupfuls of veal stock and two cupfuls of milk beaten with the yolks of three eggs. Add a tablespoonful of butter; season with salt, pepper, minced parsley, and a grating of nutmeg. Pour over the toast; cover for ten minutes and serve.

Sweetbread Soup.—Reheat one quart of veal stock and add two cupfuls of cream which has been beaten with the yolks of two eggs. Take from the fire, season to taste, and add one cupful of parboiled sweetbreads cut in bits. Garnish with one cupful of whipped cream and a bit of minced parsley.

He who has the quest of the good in his heart relates himself thereby with all the higher powers and forces of the universe and they aid him at every turn.

FAVORITE DISHES.

The old-fashioned milk toast which our grandmothers made, with plenty of butter and flour

mixed together, making a rich white sauce, is not much like the soupy mass usually served when asking for milk toast. Prepare the flour and butter, using two tablespoonfuls of butter and two of flour for each cupful of milk. When the butter is bubbling hot, add the flour; then when well blended add the milk. Cook until smooth, add salt, and turn over well-buttered toast, the edges of which have been softened by dipping them into hot milk or water. Some like a generous sprinkling of cheese; as this makes a more nourishing dish, it is especially good for a luncheon dish.

Fruit Souffle With Cornstarch.—Mix three tablespoonfuls of cornstarch, one-third of a cupful of sugar and half a teaspoonful of salt; stir into one and one-half cupfuls of scalded milk; stir until it thickens, then add three-fourths of a cupful of raisins or cherries cut in halves; cover and let cook ten minutes. Add one tablespoonful of butter and fold in the whites of three eggs beaten very light. Butter six individual molds, dredge the butter with sugar and fill the molds with the cooked preparation. Set the molds on several folds of cloth or paper in a baking pan, pour boiling water to half the height of the molds and cook about 12 minutes. Serve unmolded with cream or a custard made with the egg yolks.

Honey Frosting.—Boil half a cupful of strained honey and a tablespoonful of corn syrup to 240 degrees Fahrenheit. Pour in a fine stream the beaten white of one egg. Beat until cool before spreading on the cake.

Quick Potato Rolls.—Boil potatoes and press through a ricer. To one cupful of potato and water add half a cupful of scalded milk, three tablespoonfuls of shortening, half a teaspoonful of salt, one tablespoonful of sugar; and when lukewarm, stir in one cake of compressed yeast mixed with one-fourth of a cupful of lukewarm milk; add two and a half cupfuls of flour; cut and work the dough into a loaf and let stand to raise, cut it down once, then let raise again and make into smooth balls. Cover and let stand until light. Shape for finger rolls and when again light, bake.

Success is the inevitable result of good management, just as failure is the natural outcome of ignorance, carelessness and idleness.

SEASONABLE FOODS.

There is no waste in tripe, it is all edible and easily digested, and reasonable in price. Take care to select tender pickled tripe, wash in cold water and cut in uniform pieces. Dry in a cloth, then pat in sifted corn meal. Have ready two or three spoonfuls of hot fat in a frying pan. Set in the tripe and let cook until lightly browned on one side, then turn and brown on the other. Have ready small onions, boiled tender and seasoned with salt and butter. Serve the tripe and onions on the same dish.

Apricot Sponge.—Soften a tablespoonful of gelatin in one-fourth cupful of water and dissolve in one cupful of apricot pulp and juice, heated hot. Add one-fourth of a cupful of sugar and stir until dissolved, then when the mixture begins to become firm, beat in the whites of two eggs, beaten very light. Serve in glass cups with cream, sweetened and beaten very light. Prunes may be used in the same way. Care should be taken to use no more gelatin than needed as it is best when not quite firm enough to keep its shape.

Potato Purée.—Some potatoes are better if a little cold water is added occasionally to check the boiling. Test with a fork and when tender, drain and dry off in the saucepan; add butter, salt and a little milk, using more than for mashed potato. Rub the saucepan with the cut side of a clove of garlic. Soup stock may be used instead of milk. The purée is used as a vegetable with meat or fish.

Ginger Cream.—Make a custard of the yolks of four eggs and the whites of two, four tablespoonfuls of sugar, two tablespoonfuls of the sirup from the preserved ginger and one pint of milk. Just before the custard is done add gelatin, using enough for a pint of liquid. Allow plenty of time for the gelatin to become completely dissolved in the hot custard. As soon as the custard coats the spoon, stand the dish in a dish of cold water to check the cooking and then turn into the custard molds. Sprinkle each mold with chopped preserved ginger.

Nellie Maxwell

PARIS CLINGS TO MODE THAT SUITS

Lines of Gowns Straight Instead of Puffed Out, According to Edict.

TAFFETA GROWING IN FAVOR

Popularity of Fabric Indicates That It Will Be Favorite for Spring Wear; Guaranteed to Give Reasonable Service.

The latest fashion in Paris—to which the eyes of persons interested in dress persist in turning in spite of what America now has to offer of its own—include many useful hints to the woman who has still to think of winter clothes, states a leading fashion correspondent. In the first place, Paris fashions are apt to indicate what our fashions will be a season or two hence, and, in these days of the high cost of everything, if one must buy a frock now, it is only good sense to see that it is the sort of thing that is to be instead of what has been or is ceasing to be.

One important assertion from a Paris fashion authority is that the lines of the gowns that the Parisians have accepted for the winter are straight instead of being puffed out in places. The further the season advances, she states, the more evident it becomes that the pannier silhouette is not so popular, at least in Paris, as it was expected it might be. For an astonishing number of seasons that have trailed into years the straight silhouette has been the thing in Paris, and it looks as though the French woman is determined to hang on to a mode which so well becomes her.

Keeping Clear of Extremes. The Parisian, too, in her dressing is keeping clear of any extremes in fashion. She has always done this more or less, and she is still holding to the rule that her style once discovered must be clung to rather than changed merely for change's sake. The straight silhouette seems to suit the majority of them. They all love it and keep on wearing it. We in this country are taking up the style more and more as time goes on. Within its limitations there are many variations possible. An infinite variety of the gowns can be designed without depending upon the idea of straightness.

Sleeves in Paris are still short—very short, in fact—there being no disposition to halfway measures. If they are not very short, they are long and tight and reach over the hands, fitting snugly all the way down. Skirts, too, are as short as they were at the fall openings, which means not almost knee length, as they were in the summer, but a good 11 or 12 inches from the ground to hem.

Coats are medium length and are trimmed sparingly with fur. Some-

Dress of Black Taffeta and Monkey Fur From Madeleine et Madeleine.

times the fur is used to give a slightly exaggerated hip line as it finishes the lower edge of a coat. Then again it is employed only for a tiny collar fitting the neck snugly.

Trimming in Moderation. The trimmings on the Parisian mid-winter frocks are gorgeous and beautiful, but rather sparingly used. Little strips of gilded trimming edge necks and sleeves in clever fashion, and sometimes these edges are repeated on pocket flaps or on the edges of long slit pockets. Fringe is almost extinct, but there are bits of it seen on the ends of flapping panels or to trim the abbreviated evening skirt of an otherwise tightly fitting gown. Embroidery is more fashionable than ever, though when the French do it they lean, especially just now, to rather inconspicuous strips rather than to large and heavy banding.

Taffeta is fast growing in favor, and every day from the couturiers come new models made of this material. This would seem to indicate the popularity of taffeta for spring wear in our own country. Taffetas now are soft and pliable, and they are

guaranteed, too, to wear reasonably well, so that the purchase of them does not mean the taking of any very desperate chances.

One of the very latest of taffeta models is from Madeleine et Madeleine, a house which is the recent rage of Paris. The color is black and the stripes across the front are little tucks run in by fine hand stitches. Then there is a plaited frill of the taffeta about the neck, tied with a ribbon woven in bright green and gold threads. The overskirt, low in front and high at back, is edged with a deep fringe of monkey fur. The sleeves in this model are short and puffed.

The Parisian Waist Line.

The basque on this frock is one of the new decrees of Paris. It does not reach as low a line as basques of the past few months have done.

Street Frock of Black Velours. Skirt and Bodice Piped in Faille.

It drops just an inch or two below the normal waist line and fits rather snugly into the waist where it wrinkles slightly at the sides. All the Paris reports received in the last few weeks state that this is growing to be the waist line more and more accepted by Parisians themselves.

Another new French taffeta gown is made in shades of taupe, dark and light. The foundation skirt, a little bit fuller at the sides than it is at the back and front, is made of the darker shades and so are the little, tight, short sleeves. Then there is one of those basque waists that have just been described. This is made of the lighter shade, as are also the straight panels which fall over the skirt at back and front. There is an embroidered medallion on the front of the bodice at the waistline and one on each of the lower ends of the panels, this being done in threads of the darker shade of taupe with some gold threads intermingled. Plaited taffetas and satins and serges continue to be created and worn to a large extent in Paris. There are plaited skirts with plain basques, and there are whole plaited dresses in taffeta with only a fold of the dress's material at the neck to finish the thing off.

Modest Evening Dresses.

Evening dresses in Paris are, according to reports, taming their ways very materially. Recently at a huge reception where all of the smart people in Paris were gathered the evening gowns were of the simplest and most unradical type. In spite of all that has been heard of the low back or nothing at all in the back mode, the necks were only moderately low. The skirts were only moderately short.

Sashes of all sorts and descriptions are important parts of the later season evening gowns. They are used by the French literally to make a gown, for on the lines of the sash, the color and the manner of arrangement depends the effect of the finished creation. On a black charmeuse evening gown, interestingly draped to follow the line of the figure, a wide sash made of cloth of gold is wound about the low waist line, tied in a huge knot at the left side back and its ends lined with golden chiffon and tipped by weighty gold tassels hanging almost to the hem of the garment. Indeed, one end hangs below the hem.

Charming French Hats.

French hats for the mid-season are as plain as ever and so charming that it is hard to tell just why. For one reason they manage to fit the wearer most astonishingly. They are shaped as an adjunct to her features and as an accent to the other parts of her attire. The little, draped turbans that turn away from the face and slouch over the ears are the popular favorites.

One of the draped velvet hats peculiarly French in the way it carries out the lines of the face is in dark blue and has for its trimming two bunches of a few coque feathers each, and they stream out over each ear in the most understated and careless fashion. Draped oriental turbans made of the most gorgeous of old and new brocades are much in demand.

DADDY'S EVENING FAIRY TALE

By Mary Graham Bonner

MR. SUN'S PICTURES.

"Hellow, Dawn fairies," called Mr. Sun, as he stretched himself and looked about him.

"Yes, Mr. Sun," called the Dawn fairies. "Are you thinking of getting up, sir?"

"Yes," said Mr. Sun, "it is almost time for me to get up. You know I always get up at just the time I'm supposed to. I'm a regular old fellow that way. My time changes in the summer and in the winter and in the spring and the fall, but every day at the hour I'm supposed to get up I do. That is more than many folks can say."

And Mr. Sun laughed a jolly, good old laugh.

"You see, I called you, Dawn fairies, because I've gone into a new business. At least it isn't a new business, for I have been doing it for years and years, but I'm calling it new just to be up to date."

"Whatever are you talking about?" asked the Dawn fairies. "Won't you tell us? We don't understand at all." Just then the Sun fairies came along.

"Oh, the business is being talked of again, ha, ha," they laughed.

"We're so puzzled," said the Dawn fairies.

"Of course," said the Sun fairies, "for you weren't around the other afternoon."

"No," said the Dawn fairies, "we weren't. We are never around in the afternoon."

"Well," said the Sun fairies, "we heard a good deal of Mr. Sun's business talk and we were there helping him for a good while, though we left the Twilight fairies to finish up the pictures."

"Pictures?" said the Dawn fairies; "and business? Oh, we are so puzzled."

"I will explain it all," said Mr. Sun, "for I've a few minutes in which to stretch before it is time to get up."

"You see I heard folks talking about moving pictures. There were funny ones and one that made them cry, and there were ones of travel; in fact, all sorts."

"Now I don't like those moving picture places. They're dark and they won't ask Mr. Sun to come in. They have never once given me a pass or a box, or even asked me if I wanted to buy a ticket at the box office. It is true I wouldn't go in if they asked me."

"I have really been quite hurt about not being asked, though, and then I thought I would go into the business myself. I have always given the earth people beautiful pictures as I have gotten up and gone to bed, and at many times."

"My pictures have moved and changed, too, but I never had the modern name for them. Now I call my pictures 'Mr. Sun's Moving Pictures,' and I ask everyone to come without paying a cent of money to see them."

"I give them out of doors where everything is clear and healthy and I give them all colored, too; ah, beautiful ones. The Cloud fairies are going to help me and so are the Sun fairies as they have before, and the Twilight fairies and so many of the others."

"So I would like to have the Dawn fairies help me, too. We'll give the earth people a wonderful series of pictures of the sun getting up and of all the colors and fairies and pictures which move along with him. Will you all help?"

"Yes," shouted the Dawn fairies.

So Mr. Sun got up, peeked first above the trees, and all the fairies came along, too—they changed and they moved about and they danced, and the Sun fairies danced upon the snow, which they called the Sparkling Ball Room Picture.

"It is being talked about—our picture," whispered Mr. Sun; "yes, they're admiring us. I do believe they will like Mr. Sun's moving pictures and that I will be a success in the business. There is nothing like keeping one's name up to date, nothing at all. And," said Mr. Sun, "when I want some music to play for the beautiful pictures I'll ask the trees to furnish it. They will, never fear."

And Mr. Sun smiled broadly as he said his good-morning to the whole world, for his moving pictures were such a success, he knew!

Lead Others Wisely.

The girl who is born to leadership should take special pains to develop her judgment in order that she may lead others wisely.

Never permit a costly tendency to develop into a habit; but if the habit exists have recourse at once to Garfield Tea.—Adv.

The best sermon is the one that goes over your head and hits the other fellow.

That "bad back" is probably due to weak kidneys. It shows in a dull, throbbing backache, or sharp twinges when stooping. You have headaches, too, dizzy spells, a tired nervous feeling and irregular kidney action. Don't neglect it—there is danger of dropsy, gravel or Bright's disease! Use Doan's Kidney Pills. Thousands have saved themselves more serious ailments by the timely use of Doan's. Ask Your Neighbor!

An Iowa Case
Wm. C. Young, West St., Corydon, Ia., says: "I frequently suffered from attacks of backache and the pains were so severe that I had to cry out. My back was lame and sore constantly and the muscles were stiff, troubling me when I stooped. Doan's Kidney Pills brought me a lasting cure. I know this to be true, because my back has not troubled me for five years. My general health remains good and in every way I feel fit."

CONSERVATION OF HEALTH MADE EASY

If your stomach is out of order, don't blame it! Be sincere and avow that you are guilty of so many trespasses against proper living and proper food that the poor misused stomach must rebel! What to do? Well, read the following lines: "St. Paul, Minn., Dec. 7, 1919. Whenever I have some stomach trouble, I go at once to my druggist for Triner's American Elixir of Bitter Wine, and in 2-3 days I am again all right. Yours Henry Cerveny. Ross St." Try this remedy and you will see that Triner's American Elixir of Bitter Wine is a health-builder and a health-keeper that makes the conservation of health really easy. You can have full confidence in all Triner's remedies. Joseph Triner Company, 1333-43 S. Ashland Ave., Chicago, Ill., is a reliable firm. The U. S. government placed orders with it in 1917 and 1918 for great quantities of various medicinal preparations, and the orders were executed with scrupulous care.—Adv.

Unhappy Faculty.
"Some people have a faculty for saying the wrong thing."
"I was that way at school."

BREAKS YOUR COLD IN JUST A FEW HOURS

"Pape's Cold Compound" instantly relieves stuffiness and distress

Don't stay stuffed-up! Quit blowing and snuffing! A dose of "Pape's Cold Compound" taken every two hours until three doses are taken usually breaks up a severe cold and ends all gripe misery.

The very first dose opens your clogged-up nostrils and the air passages of the head; stops nose running; relieves the headache, dullness, feverishness, sneezing, soreness and stiffness.

"Pape's Cold Compound" is the quickest, surest relief known and costs only a few cents at drug stores. It acts without assistance, tastes nice, contains no quinine—Insist upon Pape's!—Adv.

The fool who "rushes in where angels fear to tread" sometimes proves himself to be an angel in disguise.

Never permit a costly tendency to develop into a habit; but if the habit exists have recourse at once to Garfield Tea.—Adv.

Mr. Paul R. Clark has resumed his studies at the Chicago Medical College.

Miss Lucile Folkers of North Western University and Sergeant C. E. Folkers of Western Military Academy have returned after spending the Mrs. Wm. Folkers.

Clarence Hollstein of Joliet has been a guest at the J. M. Clark home.

Miss Miriam Balchowsky entertained at a bunco party Friday evening. The out of town guests were Miss Sadye Wink, Miss Dorothy Sable and Ben Sable of Chicago.

Miss Florence Folkers has returned to Champaign where she is a student at the University of Illinois.

Mr. and Mrs. John Leuder and daughter Miss Audree of Chicago were New Year's guests at the home of Mr. and Mrs. Frank Folkers.

Miss Pearl McGlashan has resumed her studies at the University of Ohio.

Mr. and Mrs. J. M. Clark spent last week-end at Newton, Illinois.

Miss Pearl McGlashan entertained a group of young folks at her home Monday evening.

Herbert Folkers has returned to Chicago where he is a student at the Northwestern Law School.

Marley Notes.

Mrs. James R. Bowen is suffering from a severe case of LaGrippe.

Mrs. Henry Rust and babe of Marley are doing nicely.

Mrs. Ida Brown has returned from a trip to Bangor, Maine. She will spend a few weeks at the home of Rev. and Mrs. Rust in the capacity of nurse, after Mrs. Rust returns from the hospital. Mrs. Brown is sister of Mr. James R. Bowen of Marley.

Up to Him.

A yellow sheet tells of a stylishly dressed woman being found wandering in the woods, the account ending: "She was unable to give a lurid account of herself." But isn't it the yellow reporter's job to supply that?

The Man Nobody Knew

is a serial of a different kind. It follows our policy to present the best in current fiction, each story dealing with a phase of life unlike the others. Authors with a talent for presenting in a wholesome, entertaining way unusual situations and odd, original plots have been selected. Such an author, standing well near the top among contemporaries, is

Holworthy Hall

Suppose among your casual acquaintances were a man wearing a different face—not a disguise—speaking a different voice, acting and living a changed personality, whom you discover to be actually someone you formerly had known intimately. Would you not be amazed and mystified? Such is the situation in "The Man Nobody Knew," excepting that the reader holds the secret. You see him in his former identity wherein he was a failure, with record not too savory. You follow him in his changed character going among the same people with all his old proclivities and temptations, yet patiently redeeming the past, making good. His experiences and adventures are remarkable and he has the oddest, most difficult problem ever placed before a man. It especially concerns the girl who had refused him in his former life.

Heat ALL Your House Through One Register

Yes, it's just as possible in your home as it has been in 76,000 others. You, too, may have every room comfortable with balmy healthful heat, reaching every corner by Nature's method of circulation—and all through only one register! It isn't necessary to clutter up your house with pipes, overheat your cellar and incur big bills—not when you can get the

It can be set up in a day, without inconvenience to you, and will make your home so comfortable in the severest winter weather you will be well repaid. Your house will be uniformly warm; your cellar will be just right for the storage of fruits and vegetables. Your fuel bill will be less than with stoves that heat only a part of your house.

Here Are The Reasons:

The Caloric is the Original Patented Pipeless Furnace—the result of the study of competent engineers to solve the heating problem in the most satisfactory way. That they have succeeded is proved by the fact that the number of Calorics sold on an absolute guarantee of satisfaction is three times greater than any other furnace. The cause of this satisfaction lies in the patented and exclusive principles that distinguish the Caloric from all others. It is not a pipe furnace provided with an extra casing, but a complete revolution in furnace building designed exclusively for pipeless heating.

Come In And See Us

We will show you what these principles are, and you will then see what Caloric quality means, why it always succeeds and why imitations cannot accomplish the same results. Then you will be in no danger of buying an inferior article, with all its disappointment in later months.

Get a copy of our catalogue, which tells the facts about pipeless heating. If you can't come in, write for it.

FRANK MALL LUMBER CO.

MOKENA, ILLINOIS

ORLAND

The children of District No. 121 will have another week of vacation. The new school, known as the Mahaffay school, will be ready for occupancy January 12. The fixtures and furniture are to be installed this week.

A masquerade dance was given in the Woodmen hall New Year's eve by the Royal Neighbors. The Victory orchestra provided the music.

Miss Florence Myrick had a very pleasant surprise New Year's night, when a party of young people called at her home in honor of her birthday.

Mrs. William Hewson and her brother, George Deuringer, are going to accompany their mother to Orlando, Fla., for a few weeks.

Miss Carrie Riddle was quietly married to Frank Byle of Chicago on December 22. The ceremony was performed by Rev. Saunders of the M. E. church of Gresham. Their present home will be with Mr. Byle's parents until spring.

John Newman and family are expecting to return from Wichita, Kan., to their farm here in Illinois, as soon as they dispose of their property there.

SPEAKING IN TIME.

As it will not be long before the spring months will be here and also house cleaning time, our friend, Mr. C. Paul, is greatly in need of a housekeeper. Will anyone kindly volunteer?
